and register hemp products and certain intoxicating hemp products and for the marijuana enforcement division in the department of revenue (division) to regulate intoxicating products or potentially intoxicating compounds that are or may be cannabinoids. This regulation includes:

- The power to promulgate rules authorizing or prohibiting chemical modification, conversion, or synthetic derivation to create certain types of intoxicating cannabinoids;
- Labeling and advertising requirements;
- Production and testing requirements; and
- Inspection, record-keeping, and tracking requirements.

Hemp- and marijuana-derived compounds and cannabinoids are classified into three classifications:

- Nonintoxicating cannabinoids;
- Potentially intoxicating compounds; and
- Intoxicating cannabinoids.

Nonintoxicating cannabinoids that are derived from hemp may be produced, distributed, or sold as a hemp product. With the exception of products manufactured or produced for export, which are referred to as "safe harbor hemp products", products containing potentially intoxicating compounds and intoxicating cannabinoids must only be produced, distributed, or sold by a person licensed by the division to produce, distribute, or sell the compound or cannabinoid as a product.

The bill clarifies that:

- Nonintoxicating cannabinoids, potentially intoxicating compounds, and intoxicating cannabinoids are marijuana or marijuana products for the purposes of the retail marijuana sales tax; and
- A person must be licensed to manufacture potentially intoxicating compounds or intoxicating cannabinoids.

The bill prohibits the following acts:

- Manufacturing, selling, or delivering products that contain intoxicating cannabinoids in excess of limits established by rule;
- Manufacturing a product containing hemp that is not a cosmetic, a dietary supplement, a food, a food additive, or an herb; or
- Manufacturing, producing, selling, distributing, or holding for sale or distribution a safe harbor hemp product without registering with the department.

The penalty for a violation is up to \$10,000. The bill specifies factors to consider in determining the amount of the penalty.

The bill requires the executive director of the department of revenue to analyze the feasibility of establishing a standing committee to evaluate cannabinoids and cannabis-derived products for the purpose of determining and making recommendations regarding their safety profiles

and potential for intoxication. The department of revenue may engage experts to do this analysis.
