the minimum high school graduation requirements of the local education provider, successfully complete 2 courses in the area of climate literacy selected by the local education provider, and successfully complete a final experiential learning project (final project) that is approved, supported, and facilitated by a climate literacy experiential learning provider (learning provider).

The local education provider may collaborate with local businesses, nonprofit organizations, industry leaders, and institutions of higher education to support students' climate literacy.

Beginning with students in the sixth grade, each local education provider shall annually notify students and their legal guardians of the requirements for obtaining a seal of climate literacy.

On or before July 1, 2025, and every July 1 thereafter, each local education provider shall collect data on the seal of climate literacy, including:

- The schools that awarded the seal of climate literacy;
- The number of students who received the seal of climate literacy;
- The types of final projects students have completed;
- The names of the learning providers that approve, support, and facilitate students' final projects;
- A list of academic courses students have completed to earn the seal of climate literacy; and
- Any other findings related to the seal of climate literacy.

On or before October 1, 2025, and every October 1 thereafter, each local education provider shall submit a report to the department of education (department) summarizing the data collected.

The department may collaborate with a nonprofit organization to evaluate the data collected and prepare a report summarizing the data. On or before January 15, 2026, and every January 15 thereafter, the department shall submit the report to the house of representatives education committee and the senate education committee, or their successor committees, and the state board of education.
