# A BILL FOR AN ACT

#### 101 **CONCERNING HVAC INFRASTRUCTURE IMPROVEMENT PROJECTS IN**

102 SCHOOLS.

## **Bill Summary**

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)

The bill requires a school district board of education, a charter school, an institute charter school, a board of cooperative services, or the Colorado school for the deaf and the blind (school administrative entity) to satisfy certain requirements concerning installation, inspection, and maintenance of heating, ventilation, and air conditioning (HVAC) systems in schools if the school administrative entity undertakes HVAC

infrastructure improvements using money made available by a federal government source or by a federal government source in combination with a state government source specifically for such purpose.

The requirements established in the bill concern:

- Ventilation verification assessments, which include assessments of an HVAC system's filtration, ventilation exhaust, economizers, demand control ventilation, air distribution and building pressurization, general maintenance requirements, operational controls, and carbon dioxide output;
- The preparation of HVAC assessment reports;
- The review of HVAC assessment reports by mechanical engineers, who make recommendations regarding necessary repairs and improvements and estimate associated costs;
- HVAC adjustments, repairs, upgrades, and replacements;
- The preparation of HVAC verification reports and the submission of the reports to the state board of education; and
- Periodic inspections and ongoing maintenance.

The bill establishes mandatory criteria that an HVAC contractor must satisfy in order to perform work described in the bill. A school administrative entity that undertakes HVAC infrastructure improvements using money made available by a federal government source or by a federal government source in combination with a state government source must do so using only contractors on the certified contractor list established by the department of labor and employment.

The bill allows a school administrative entity to apply for grants to pay for HVAC infrastructure improvement projects and establishes requirements for school administrative entities that apply for grants from federal and state government sources.

The bill allows the governor's office to expend money from the "Infrastructure Investment and Jobs Act" cash fund to provide grant writing support and project planning support to school administrative entities that are undertaking HVAC infrastructure improvement projects.

**SECTION 1. Legislative declaration.** (1) The general assembly

3 finds that:

4

(a) Students and staff in Colorado's public schools deserve access

5 to clean, healthy air along with proper heating and cooling to improve

<sup>1</sup> Be it enacted by the General Assembly of the State of Colorado:

1 their opportunities to learn;

2 (b) Indoor air quality is one of several toxic threats to students in3 schools;

4 (c) The condition of inadequate school facilities can expose 5 students and staff to mold and legacy toxins such as lead, asbestos, and 6 industrial products and chemicals known as PCBs; poor air quality and 7 temperature control; inadequate lighting; and excessive noise; and

8 (d) Improving the air quality in schools can result in higher 9 attendance, better cognitive function, less asthma and other respiratory 10 health problems, and improved academic performance.

11

(2) The general assembly further finds that:

12 (a) In Colorado, many of the conditions that cause unhealthy13 indoor air and environmental quality impact Colorado school buildings;

(b) Various Colorado schools have been featured in news stories
profiling funding shortages, heating and cooling issues, and the need for
facility improvements;

17 (c) The department of education's own Facility Insight Dashboard
18 reports the average age of school infrastructure to be forty years; and

(d) State school buildings receive a poor score on the departmentof education's Facility Condition Index.

21

(3) The general assembly further finds that:

(a) Despite efforts by state agencies and school districts to
improve indoor environmental quality in classrooms and other school
buildings, many of Colorado's school districts lack the funding and staff
to improve facility conditions and thereby improve school health
outcomes;

27

(b) According to the American Society of Civil Engineers' 2020

infrastructure report card, Colorado schools have an approximately \$14
 billion funding gap between the need for infrastructure replacements,
 repairs, or upgrades and money available from regular funding and budget
 processes;

5 (c) The current funding sources for schools do not equitability
6 distribute funds, leaving many schools in rural and disproportionately
7 impacted communities unable to pay for necessary retrofits and updates;

8 (d) The passage of the federal "Inflation Reduction Act of 2022" 9 and "Bipartisan Infrastructure Law", which was enacted in the federal 10 "Infrastructure Investment and Jobs Act", have made billions of dollars 11 in federal money available to combine with current and planned state or 12 local funding that can help public schools improve air quality, improve 13 student performance and staff retention, and realize significant energy 14 savings for school districts;

(e) Accessing this federal money would not only improve air
quality in schools but also bring billions of dollars in economic
investments in quality projects to Colorado communities and workers;
and

(f) Unfortunately, many of the schools with the most pressing
infrastructure improvement needs lack the staff capacity to track, apply
for, and manage grant funding available at the state and federal level.

(4) Therefore, the general assembly declares that, in order to helpschools address health concerns and energy efficiency needs, this act:

(a) Makes <u>local education providers, including the Colorado</u>
<u>school for the deaf and the blind,</u> eligible to receive grants from the
"Infrastructure Investment and Jobs Act" cash fund created in Senate Bill
22-215, which was enacted in 2022;

-4-

1 (b) Authorizes the governor's office to coordinate with outside 2 entities to provide <u>local education providers</u>, <u>including the Colorado</u> 3 <u>school for the deaf and the blind</u>, with project planning, grant writing, and 4 other technical assistance, such as school ventilation and energy 5 efficiency verification, as needed;

6 (c) Ensures that school districts' federal funding applications 7 remain competitive by requiring the use of certified contractors <u>or the</u> 8 <u>negotiation of a project labor agreement</u> to complete HVAC infrastructure 9 improvement projects receiving federal funding and requiring compliance 10 with the labor standards outlined in federal funding opportunities; <u></u>

(d) Will save schools money by ensuring that facility improvement
projects are completed by a highly skilled workforce and result in
measurable energy efficiency improvements and health improvements for
students and staff; and

(e) Allows Colorado's school districts to choose to undergo an
 <u>HVAC assessment and find a pathway to fund any improvements</u>
 <u>identified without mandating that any school must undergo an assessment</u>
 <u>or HVAC improvements.</u>
