A BILL FOR AN ACT

101 CONCERNING THE USE OF ELECTRONIC FENCE DETECTION SYSTEMS.

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at http://leg.colorado.gov.)

The bill defines an electronic fence detection system, which is a security system that is used in conjunction with a fence. An electronic fence detection system includes a detector that, when contacted, causes an alarm system to transmit a signal to the property owner, a monitoring company authorized by the property owner, or law enforcement.

The bill allows a local government to impose installation or operational requirements for an electronic fence detection system that are consistent with the installation or operational requirements generally HOUSE Amended 3rd Reading February 28, 2025

HOUSE Amended 2nd Reading February 27, 2025 required for other alarm systems. In addition, the bill allows a local government to require a permit for the installation or use of an electronic fence detection system that is not in addition to any permit generally required for the installation or use of any other alarm system. Lastly, the bill allows a local government to inspect an electronic fence detection system.

1	Be it enacted by the General Assembly of the State of Colorado:
2	SECTION 1. Legislative declaration. (1) The general assembly
3	finds and declares that:
4	(a) Certain alarm systems have battery-charged detectors that,
5	when contacted, transmit a signal to a real property owner or law
6	enforcement;
7	(b) These alarm systems are often used to protect critical
8	infrastructure, including cell phone towers, electric substations, and
9	internet service provider huts, as well as commercial construction sites
10	and other sites that are often vandalized or subject to thievery. In
11	particular, these alarm systems help prevent the theft of copper wire,
12	which is critical to maintaining the state's power grid and
13	telecommunications network.
14	(c) Such alarm systems:
15	(I) Reduce crime by causing potential thieves or vandals to rethink
16	their criminal intentions;
17	(II) Avoid adding to police backlogs by reducing crime;
18	(III) Help keep communities safe; and
19	(IV) Enable real property owners to have an effective means of
20	safeguarding assets;
21	(d) Extensive and arduous planning, zoning, permitting, and
22	variance requirements for these alarm systems could significantly delay

2	equipment; and
3	(e) There is a need for a statewide standard for the regulation of
4	these alarm systems, similar to how there are statewide standards for the
5	regulation of other alarm systems.
6	SECTION 2. In Colorado Revised Statutes, add article 5.8 to title

20	(a) Is connected to an alarm system and to integrated
21	COMPONENTS OR EQUIPMENT;
22	(b) At the time a fence is installed, has an energizer

24	MEETS THE STANDARDS SET FORTH BY THE INTERNATIONAL
25	ELECTROTECHNICAL COMMISSION STANDARD 60335-2-76;
