Summary of Legislation

Under current law, the owners of certain buildings are required to submit annual reports on energy benchmarking data to the Colorado Energy Office under the Building Performance Program. Buildings used for agricultural purposes are exempt from the reporting requirements. The bill clarifies which agricultural buildings qualify for the exemption.

State Revenue and Expenditures

The bill may result in some buildings no longer being covered by the Building Performance Program. This reduces state revenue and expenditures, as those building owners will no longer pay the \$100 fee and program staff will no longer incorporate those buildings into the program. This fee revenue accrues to the Climate Change Mitigation and Adaptation Fund, which is continuously appropriated to the Colorado Energy Office, and is subject to TABOR. The number of buildings impacted by the bill is expected to be small and any change in state revenue or expenditures is minimal.

Effective Date

The bill takes effect 90 days following adjournment of the General Assembly sine die, assuming no referendum petition is filed.
