# DEPARTMENT OF PUBLIC SAFETY

# FY 2025-26 JOINT BUDGET COMMITTEE HEARING

# Friday, December 13, 2024

### Division of Criminal Justice (DCJ) 1:30-2:30 PM

### All Divisions except for Criminal Justice 2:30-4:30 PM

### 1:30-1:35 Introductions and Opening Comments for DCJ

Presenter: Stan Hilkey, Executive Director

# 1:35-2:15 Community Corrections

Main Presenters:

- Stan Hilkey, Executive Director
- Matt Lunn, Director, Division of Criminal Justice

### Supporting Presenters:

- Katie Ruske, Manager, Office of Community Corrections
- Jeremy (Jess) Brandt, Associate Director, PPMU/Offender Services
- David (Dave) Wolfsgruber, Director, Adult Parole

### Topics:

- Community Corrections: Page 1, Questions 1-3 in the packet, Slide 6
- DOC inmates in the community: Page 3, Questions 4-14 in the packet, Slides 7-13

### 2:15-2:30 Budget Requests

Main Presenters:

- Stan Hilkey, Executive Director
- Matt Lunn, Director, Division of Criminal Justice

### Topics:

- Crime prevention environment design: Page 12, Questions 15-17 in the packet, Slides 14
- Youth delinquency prevention grants: Page 14, Questions 18-22 in the packet, Slides 15
- H.B. 24-1219 First Responder Employer Health Benefit Trusts: Page 18, Questions 23 in the packet, Slides 16

### 2:30-2:45 Introductions and Opening Comments (all divisions except Criminal Justice)

Presenter: Stan Hilkey, Executive Director

### 2:45-2:50 Common Question

Main Presenters:

• Stan Hilkey, Executive Director

### 2:50-3:10 Budget Requests

Main Presenters:

- Stan, Executive Director
- Kevin Klein, Director, Division of Homeland Security and Emergency Management
- Matt Packard, Chief, Colorado State Patrol

### Supporting Presenters:

• Pete Bangas, Director, Office of Public Safety Communications

### Topics:

- R1 DTRS Ongoing Operations: Page 19, Questions 25-28 in the packet, Slides 7-8
- R2 PPE Stockpile: Page 20, Questions 29 in the packet, Slides 9
- R4 CSP Academy Dining Services: Page 21, Questions 30-31 in the packet, Slides 10

### 3:10-3:30 Past Budget Requests

Main Presenters:

- Stan Hilkey, Executive Director
- Matt Packard, Chief, Colorado State Patrol
- Chris Schaefer, Director, Colorado Bureau of Investigation

### Supporting Presenters:

• Lance Allen, Deputy Director of Forensics

### Topics:

- Auto-theft: Page 22, Questions 32-33 in the packet, Slides 11-12
- CBI DNA testing: Page 24, Questions 34-35 in the packet, Slides 13
- Background Checks: Page 24, Questions 36 in the packet, Slides 14

### 3:30-4:30 Other issues

Main Presenters:

- Stan Hilkey, Executive Director
- Chris Schaefer, Director, Colorado Bureau of Investigation
- Kevin Klein, Director, Division of Homeland Security and Emergency Management
- Mike Morgan, Director, Division of Fire Prevention and Control
- Matt Packard, Chief, Colorado State Patrol

### Supporting Presenters:

• Vaughan Jones, Chief, Wildfire Management Section

### **Topics:**

- Continuously appropriated funds: Page 24, Questions 37-38 in the packet, Slides 15
- E911 Enterprise Fund: Page 32, Question 39 in the packet, Slides 16
- HUTF and other questions: Page 32, Questions 40 in the packet, Slides 17

# DEPARTMENT OF PUBLIC SAFETY FY 2025-26 JOINT BUDGET COMMITTEE HEARING

# Friday, December 13, 2024

### Division of Criminal Justice 1:30-2:30 PM

### All Divisions except for Criminal Justice 2:30-4:30 PM

# DIVISION OF CRIMINAL JUSTICE

# COMMUNITY CORRECTIONS

1. [Sen. Gonzales] What is the Department doing to address the approval and rejection rates for the local community corrections boards? Please answer this for both diversion and transition placements.

**Response:** The Office of Community Corrections (OCC) has been collecting data on the acceptance and rejection of referrals into the community since the passing of H.B.18-1251. The data has highlighted the vast discrepancy between the acceptance rates of diversion and transition referrals within the system and the need to address acceptance and rejection rates with community corrections boards and providers. Given the data collected, it was recognized that acceptance and rejection rates of transition clients needed to be the focus of any efforts. While local control plays a critical role in the success of the community corrections system, it is critical to understand the decisions being made at the local level and their overall impact to the efficiency of the system.

The OCC has undertaken several efforts in collaboration with the DOC centered around information gathering, education, and collaboration. Within the DOC, community corrections stakeholders have been invited to participate in Case Management III meetings and in-reach opportunities into the prisons to learn about programming. In addition, a great deal of focus has been placed on educating community corrections boards in a variety of areas including but not limited to the referral packet information, utilized risk assessments, bias in decision making, and more. The OCC has also provided targeted presentations directly to local community corrections boards and the Colorado Association of Community Corrections Boards to address acceptance rates that have included data, myth busting, and discussions of overall system efficiency. These efforts have also included encouraging community corrections boards to include individuals with lived experience on their boards.

The OCC has started to see increased engagement from community corrections boards and providers on issues related to acceptance rates. Local community corrections boards have increased their engagement on this topic, including reaching out to the OCC for technical assistance and training on areas related to auto acceptance, bias in decision making, and more. Some local community corrections boards have started to include individuals with lived experience onto their boards. In addition to this, the Coalition of Community Corrections Providers has made the topic of acceptance rates part of their strategic plan, with the commitment to bring together stakeholders to explore and address the issue. The Coalition has established a committee that includes participation from the CACCB and our office which is set to have its first meeting on December 9, 2024.

The OCC remains committed to addressing acceptance and rejection rates into community corrections programs. The OCC will continue to push the issue forward looking for new opportunities and possibilities for system improvements.

2. [Sen. Amabile] Are these residential treatment programs are 100% General Fund? Is there any Medicaid?

**Response:** Intensive Residential Treatment and Residential Dual Diagnosis Treatment programs are currently 100% funded with General Fund or Reappropriated Funds. A portion of IRT placements are funded through the Reappropriated Funds received through the Correctional Treatment Board to cover IRT programming for referrals from Probation. The Department has been working with Health Care Policy and Financing (HCPF) to determine the best way to eliminate barriers to the utilization of Medicaid to pay for a portion of these programs. The current goal is to have all contracts updated by July 1, 2025 to allow for eligible providers to bill Medicaid when a client is eligible to have the services covered. It is important to note that Medicaid will not be able to entirely replace the need for General Fund. Not all clients in community corrections are eligible and enrolled in Medicaid. Clients in community corrections are employed and do not always meet the requirements for enrollment. In addition, the medical model of reimbursement does not always match the criminogenic needs leading to services either not being approved or not being approved for the entirety of the treatment. Not all providers are currently Medicaid providers and some have expressed concerns about the additional burden of becoming a Medicaid provider given the size of their programs and other factors. Given these considerations and some current limitations in the current data set, it is difficult to determine the General Fund savings that will be obtained from the change coming next fiscal year.

3. What does DCJ want or need from DOC and Judicial to increase the number and efficiency of community corrections placements?

**Response:** Both DOC and Judicial have been and remain valuable partners. In addition to all of the ways we communicate and collaborate outside of specific community corrections boards, many boards and screening committees have staff that are members of these groups making decisions about referrals. As influential partners, having the staff of both of these agencies who are voting members on referrals understand the need to increase acceptance rates and provide opportunities for individuals in community corrections is vital. Having these individuals support messaging and goals on increasing the number and efficiency of placements would be extremely helpful in support of our efforts. As part of the strategy to gather more information on acceptance rates and try to increase the number of approvals, it was determined to be prudent to identify these individuals and bring them together to learn more about their direct experiences participating in these processes and impression of the acceptance rates. Given the lower acceptance rates of transition clients, OCC is starting this process with DOC staff. OCC recently sent a request to all boards asking them to provide contact information for any DOC staff sitting on their board or screening committee. Our plan is to collaborate with DOC leadership to meet with these individuals and learn more from them.

In addition, continued collaboration on increased data and information sharing would be valuable in better understanding the efficiency of placements, especially in regards to

acceptance and rejection of referrals. As referrals do not currently have one central statewide repository, data and information is needed from the referring agencies to have a better understanding of any barriers, opportunities for improvement, or for the dispelling of myths related to acceptance and rejection rates across the state. Additional and more complete data will allow all parties to collaborate on system improvements related to the referral process and the information included.

### DOC INMATES IN THE COMMUNITY

4. [Rep. Taggart] How, and how much, does the Division collaborate with the Department of Corrections? What does the Department want or need from the Division of Criminal Justice in order to increase the number of community placements?

**Response:** DCJ collaborates closely with DOC on matters related to community corrections. DCJ staff, along with community corrections boards and providers, participate regularly in Case Manager III meetings, in-reaches at DOC prisons, and many other engagements. In turn, DOC leadership and staff participate in community corrections stakeholder meetings regularly to provide information and answer questions. Additionally, DOC and DCJ have collaborated on system improvements to processes and forms to benefit all parties involved which includes: updating forms, improvement of data management systems, and data sharing. DCJ asks for continued collaboration and support in the goal to increase the number of community corrections placements. Further collaboration on data and information sharing related to community corrections referrals, waivers, and denial reasons would further inform strategies for improved system efficiency.

5. [Sen. Amabile] In a flowchart, please map how a transition placement ends up in community corrections. It should indicate each point where a decision gets made, who makes the decision, and whether that decision is mandatory (e.g. required by statute) or discretionary (e.g. requires personal judgment).

**Response:** Below you will find the requested flowchart along with a numbered narrative providing more detail to explain each element of the chart.

• #1 The client is eligible for a community corrections referral when they meet all criteria in DOC A.R. 550-01 and can be referred per C.R.S 18-1.3-301.

- Non-violent offenses: referral can be submitted for screening 19 months prior to P.E.D. (can place at 16 months)
- Violent offenses: referral can be submitted at 9 months prior to P.E.D. (can place at 6 months)
- #2 When eligible, the client may refuse/waive a referral, per C.R.S 18-1.3-301. A waiver is used by DOC to document any reason a client may not be referred for community corrections at that time, which include a client waiving a referral by choice or due to ineligibility.
  - Other reasons a waiver may be completed include: pending charges or COPD (Code of Penal Discipline) convictions that make the client ineligible, pending DOC program completion, or release plan difficulty, to name a few.
  - It is the client's responsibility to subsequently rescind the waiver, allowing their referral only when and if they are willing/able to do so.
- #3 DOC Case Manager completes a community release plan (CRP) (required information per DOC A.R. 550-01 and HB 18-1251), including a recommendation or reason why placement is or is not recommended based on an individualized review that considers risk, institutional conduct and responsivity factors.
  - DOC CM electronically submits the referral packet to the Community Referrals Unit (CRU)
- #4 The CRU reviews for inclusion of required documents, adherence to eligibility timelines and victim notification requirement per C.R.S 24-4.1-302.5.
  - If victim notification is required, the CRU will notify the Victim Services Unit (VSU) and the referral is placed on a 30-day hold pending victim impact statements, which will be forwarded to the community corrections board and program(s).
- #5 CRU referral process:
  - Submit referral to the primary Judicial District.
  - The primary JD is determined by the board and program(s) located in, or at the nearest county of, the client's intended community referral/parole destination, per DOC A.R. 550-01.
- #6 The primary JD board and/or program(s) screen utilizing a structured decisionmaking (SDM) process, which includes actuarial risk assessments and professional judgment.
  - The screening process and order varies among boards and could include: if program accepts then board screens; if board accepts then program(s) screen; board and program screen together; board may have auto-accept criteria where no formal screening by the board is needed and only the program(s) screen.

- Boards may have different levels of screening: auto-accept (no screen), screening committee, full board.
- It's typical with the board screen that majority vote rules, but the actual process of the screen and vote varies among boards.
- If the primary JD denies the client, the referral may be sent to an alternate JD.
- The alternate JD is determined by considering the county of conviction, case manager requests, available bed space, and proximity to parole destination per DOC A.R. 550-01.
- The board and/or program enter their accept or deny decision into the DOC data system, including denial reason(s) and a time frame that JD would screen that referral again: 6, 9 or 12 months.
- If the client is accepted by the primary or alternate JD, they are scheduled for transfer by the CRU when a bed is available.
- *#*7 The DOC CM will notify the client of the decision.
- If the client is denied, the DOC CM notifies the client of the denial reason(s) provided and the timeframe they can be re-referred to that JD.
- #8 Refer again when eligible.
- In 6 months, or
- If the client will be referred back to a JD that initially denied, the re-referral will follow the timeframe entered by that JD for re-referral (6, 9 or 12 months).
- 6. Briefing document] There has been a large decline in the percentage of inmates in the DOC's Intensive Supervision-Inmate (ISP-I) program. Why? Please prioritize the factors, from biggest impact to least impact, that are hindering the number and efficiency of DOC community placements.

# **Response:** This question is replicated in the DOC Hearing Questions and will be addressed in the DOC responses in consultation of DPS as appropriate.

7. [Briefing document] The proportion of DOC inmates transitioning to community corrections is also lower than it was a decade ago, despite efforts to the contrary. Why? Please prioritize the factors, from biggest impact to least impact, that are hindering the number and efficiency of DOC community placements.

**Response:** As demonstrated in the briefing document, over the past decade Diversion placements in community corrections grew significantly. This represents a meaningful increase in the usage of community corrections as an alternative sentence to prison. Pursuant to sentencing statutes, individuals sentenced to community corrections generally are ineligible for probation, therefore a sentence to community corrections prevents placement within the DOC. Higher Diversion utilization may create some limits on capacity available for transition placements. Program closures across the state over the past decade have also lowered overall capacity in community corrections for all populations.

Overall community corrections statewide has lost 10 programs and the average daily population has dropped more than 700 beds since 2018. While the majority of capacity was lost in the City and County of Denver and they are working to recoup some of it, capacity in Denver remains reduced. Despite this overall loss of capacity, over the past two years (Sep 2022 to Sep 2024) the total DOC inmate population (and prison only) population increased by 4% while the Community Corrections Transition population increased by 16%. As detailed throughout this response, the OCC, DOC, boards and programs continue to collaborate to improve transition placement rates. The OCC recognizes the ongoing need to improve on system efficiency related to the placement of transition clients into community corrections.

8. [Briefing document] How can the State ensure that qualified DOC inmates are approved for a placement in a program that provides an appropriate level of supervision and services? What steps may the State take, or not take, and in what order? If an answer to this question is not available in time for the hearing, how might the DCJ go about answering this question?

**Response:** There are several areas the State could examine for their viability, appropriateness, and potential effectiveness to ensure that qualified incarcerated persons are approved for placement in community corrections.

# **Centralized Referrals**

As seen in the responses to questions #10 and #11, referral, screening, and acceptance practices across the state lack a consistent structure and approach. The methods for transmitting referrals to boards and programs vary greatly between DOC and each of the 22 judicial districts. Subsequently, each of the 22 community corrections boards and 27 community corrections programs have different practices for reviewing/screening those referrals and determining placement. Accordingly, in order to collect the requisite data related to referrals and acceptance rates, the OCC relies on manual data collection provided by disparate agencies. This greatly limits the type, timeliness, accuracy, and efficacy of the data the DCJ are able to utilize to analyze and impact referral and acceptance practices.

While it would be a significant undertaking and come at some initial cost to the State, a centralized hub through which all referrals are processed would modernize and streamline statewide activities. A centralized referral hub would not only create consistency in referral practices, it would significantly improve the ability of the OCC to provide oversight and accountability for screening and acceptance practices. Real time data could be collected to track who is being referred, when, by whom, how long the process takes, and who is accepted/rejected, as well as provide insight into the characteristics and reasons for acceptance/rejection. Such a hub would have the added benefit of allowing the OCC to track waitlists statewide in conjunction with available capacity data already present in the Community Corrections Information and Billing (CCIB) system.

# **Referral Generation and Waivers**

As mentioned in the briefing, the DCJ has previously responded that the mandatory initial referral statutes may benefit from a review. The statutory structure for initial mandatory

referrals from the DOC is driven by time and crime type, and does not account for appropriateness of the referral. While there are helpful DOC policies that aid in trying to ensure an individual is a suitable candidate, there is no consideration of appropriateness based upon risk, need, and readiness. Case managers are able to provide a recommendation in the referral process, but their professional judgement that an individual is not ready or appropriate for community corrections does not stop the mandatory referral.

In addition to a review of the mandatory initial referral statutory structure, it would be beneficial to review the current waiver process. Incarcerated individuals are able to waive their referral to community corrections. While data is not currently collected on the reasons for waiving a referral, anecdotal information would suggest that some individuals fear rejection or believe they will reach parole sooner if the referral is waived and wait for their parole hearing. The State could review this part of the process as well and consider changing from a waiver of referral to a waiver of placement. While this would certainly increase the workload for all parties involved, it could be hypothesized that incarcerated individuals will be less likely to waive once they know they have been accepted for placement.

# Mandatory Auto Acceptance Criteria

There is the possibility of a statutory structure of auto acceptance criteria for transition referrals. A mandated set of consistent statewide criteria for acceptance for some referrals would allow individuals greater transparency and opportunity to be accepted into community corrections. Mandated auto acceptance criteria represents an opportunity to balance system needs with the benefits of local control. Community corrections boards and providers would retain the responsibility to approve and review any referral that does not meet the auto acceptance criteria. A limited number of community corrections programs have already adopted a set of criteria for auto acceptance, and the issue is further discussed in questions #12 and #13.

DCJ remains committed to improving data analysis, continuing stakeholder engagement, and developing holistic solutions to improve the effectiveness of a state-wide system while recognizing the importance of local control.

9. [Sen. Bridges] To what extent are recidivism outcomes for transition and ISP-I placements comparable to other forms of release? Is such a comparison possible?

**Response:** Generally, outcomes and recidivism rates between agencies should not be compared. Comparing rates across agencies promotes a false equivalency and is not scientifically appropriate or defensible. There are a host of methodological and practical reasons as to why within-population comparisons may be appropriate, but between-population comparisons are not. First, individuals may be represented within multiple cohorts. For example, a person who is placed on ISP-I may have gone through a community corrections program prior to their ISP-I placement. In a similar manner, an individual who appears to have bypassed community corrections and gone straight out to parole may have participated in a community corrections program at a different point during their sentence. Movement through the criminal justice system and corrections approaches is

rarely linear. Accordingly, it may be difficult to determine to which agency to attribute any long-term outcome such as recidivism. Second, although some of these studies will include overlapping individuals, the agency populations include individuals with different criminal risk profiles, protective factors, service provision, and community support. Comparing the outcomes of ISP-I and parole participants to those in community corrections where supervision practices and client risk/need profiles can be fundamentally different, will not provide meaningful insight into their effectiveness. Instead, comparing community corrections' recidivism from year to year can help identify the impact of policy, legislative or programmatic changes on that specific population. DCJ looks forward to opportunities to partner with other agencies on identifying and reporting on meaningful outcomes across the criminal justice system.

- 10. [Briefing presentation] What data do the DCJ and DOC have regarding denial reasons for both transition and ISP-I referrals? Please elaborate on this process and the data that are available.
  - If such data exist, what level of specificity exists for reasons that fall under "professional judgment" as allowed by statute?
  - Have these data been useful in any decision-making processes? If yes, how so? If no, what needs to change to make the data more useful?

**Response:** The denial reasons that are currently available were created by a stakeholder group, consisting of community corrections boards, providers, OCC and led by DOC, after the implementation of HB 18-1251. These reasons reside in the DOC's data system and can only be accessed by OCC upon request from DOC. The reasons available are primarily research-based and most require a text box to be completed for more detailed feedback or the selection from multiple choice items. There is also an 'Other' option, which also has a required text box. Boards and providers may select up to five (5) denial reasons per referral. Overall, considering each board's screening process with each board member's vote and voice, and the ability to select up to five (5) denial reasons with individualized notes, it is difficult to clearly distinguish those that are based on professional judgement. The table below represents the denial reasons and their frequency of occurrence for CY22. For this date range, there were approximately 8,405 denial reasons entered for approximately 4,435 referrals. 'Other' continues to be a top reason for denial, and while there is not a way to distinctly sort or categorize the rationale due to its being an open text box, the highest occurring notes include: client's level of risk, clients needing additional treatment and/or programming in DOC prior to release, not enough time served, their SDM tool recommending deny, and the client's violent/assaultive history.

Reason Selected	Frequency
Other	20.2%
Disciplinary History	13.5%
Pattern of Community Supervision Failure	11.2%

Current Offense	9.3%
Criminal History	9.0%
Lack of Area Ties	7.7%
DOC Program Needs	7.1%
Severity of Crime	6.4%
Community Impact	5.2%
Escape History	4.4%
Time Constraints	2.6%
Victim Impact	2.1%
Gang Affiliation	0.8%
Insufficient Information (per HB 1251)	0.3%
Lack of Employability	0.2%

The ability to request denial reasons data from DOC and review these data have been useful at both the board and state level. Based on frequent feedback from DOC clients denied community corrections placement and their Case Managers, denial reasons that have a dynamic factor focused on change within the client's control are more useful than those that are static that the client cannot change. OCC and some individual boards have used these data to raise board members' awareness on the frequency of reason occurrences and train on those factors that are research-based and correlate to risk, as well as recommendations to include areas in which they want to see the client progress that are within the client's ability, as each denial can select up to five (5) reasons. DOC Case Managers have reported that dynamic denial reasons can be incorporated into client's case plans and programming where progress can be monitored.

Some boards have been analyzing their own congruence data, the rate at which the screening outcome aligns with their SDM tool's recommendation or guidance, and it would be useful to see these results from more boards within the context of their acceptance rates and denial reasons. This would allow OCC to identify opportunities for more individualized discussion and education.

11. [Sen. Kirkmeyer] How and how often does the Office of Community Corrections interface with district attorneys and related associations?

**Response:** It is very common for district attorneys' offices to have a seat on their local community corrections board and/or screening committee. The DCJ interacts with those individuals when we provide training and presentations to local boards, as well as when

they also attend CACCB meetings. Additionally, OCC and DCJ more broadly and routinely engage with the Colorado District Attorney's Council (CDAC) on a wide range of public safety issues, and both agencies are committed to ensuring suitable placement for those in need of community corrections services.

12. [Briefing document] What auto-accept criteria are currently in use by different jurisdictions? Do these criteria have anything in common?

**Response:** There are six community corrections boards that currently have auto-accept criteria in policy: 2nd, 4th, 8th, 17th, 18th and 19th judicial districts. Most are written in an exclusionary manner, meaning that if the client's history does not include certain current or prior criminal offenses that require board screening, they may be auto-accepted. In general, their policies have much in common, including cases that do not fall under the Victim Rights Act. A few factors where boards differ include: active cases outside of their jurisdiction, the client being deemed unemployable, prior unauthorized absence (escape), and being negatively terminated by their community corrections program(s), to name a few. All boards' screening procedures and acceptance criteria are available for review.

13. [Briefing document] Would the number of placements meaningfully change if more districts adopted similar criteria?

**Response:** If more districts adopted similar auto-accept criteria, it is unknown if the number of placements would meaningfully increase in that jurisdiction. Of the six (6) that currently have a policy in practice, their auto-accept rates vary greatly. For FY24, overall transition acceptance rates for each of these six boards ranged from 25%-63% and auto-accept rates for DOC Transition referrals screened by the board ranged from 6% - 27%. These differences may be at least in part attributed to those policies that restrict auto-accept based on where the active case(s) originated. The potential impact of auto-acceptance criteria on transition placements is greatly dependent on the content of those criteria. Further analyses and stakeholder collaboration would be required to determine which criteria would be most appropriate and foster meaningful change in transition placements.

14. [Briefing document] Are there any budget mechanisms that could incentivize such criteria? Could similar mechanisms increase risk tolerance, or is risk tolerance not an issue?

**Response:** Incentivizing community boards for the utilization of auto acceptance criteria would have to be done through the board administrative dollars allocation. Currently, 17-27-108(4),C.R.S. dictates that boards may receive up to 5% of their total allocation for board administration. The Division has been exploring funding options for these dollars to ensure equity and availability of the resources needed to comply with statutory obligations. As a part of this exploration, focus groups were held in the most recent year with community corrections board and included discussion of incentivizing acceptance rates. Community corrections board members were not motivated by this incentive since the funds are utilized for the county's obligations to the contracts and oversight of community corrections. Board and screening committee members see their duty to be to

their community members and public safety, and believe their referral decisions are directly tied to this duty. It was expressed that incentivization would not change their actions. Feedback from these focus groups suggested that trying to incentivize acceptance rates or the utilization of the criteria could have the opposite of the desired effect without more buy-in from community corrections board members. In addition, it is difficult to create a meaningful incentive structure or changes to the administration of board administrative funding within the confines of the current statute. In regards to incentivizing acceptance criteria for programs, the current performance-based contracting structure was designed to be flexible so that metrics could be changed or added. This structure could be utilized to incentivize the use of auto acceptance criteria.

Currently, most, if not all structured decision-making tools consider validated risk assessments as part of the decision-making process and the tools indicate that higher risk clients are appropriate for the level of supervision provided by community corrections. As demonstrated in Table 1 below, community corrections intake data suggest that both community corrections boards and providers are accepting high and very high-risk clients into community corrections across all client types. Most individuals from DOC have slightly lower risk scores as they have been incarcerated and receiving programming which has lowered their risk. More detailed data and information about referrals would be needed to better understand how risk level and tolerance impacts acceptance and denial decisions. The Division has made efforts to ensure that performance-based contracting does not incentivize both boards and programs to take only lower risk clients by ensuring that the incentivized metrics for successful program completion and recidivism are adjusted for risk.

# **BUDGET REQUESTS**

CRIME PREVENTION ENVIRONMENTAL DESIGN

15. [Rep. Bird] Of the original \$10.0 million General Fund appropriation from S.B. 22-001, how much has been spent for the grant program? How much has been encumbered?

# **Response:** The table below shows the amount spent by fiscal year, as well as the remaining balance.

FY	Grant Period	Number of Awards	Amount Awarded	Deobligated by Grantees	Remaining Balance
FY 2023	1/1/2023 - 6/30/2023	23	\$6,284,732	\$43,789	\$3,774,370
FY 2024	7/1/2024 - 6/30/26	14	\$3,585,336	0	\$189,03 4

\*The first round of grant awards were granted extensions once the grant program was extended through legislation in 2023. (S.B. 23-277).

\*Administrative funds balance (for staff and admin costs to run program): \$135,906.72

16. [Sen. Bridges] Please provide data showing the effectiveness of this program with respect to:

- Crime reduction
- Public safety
- Overall quality of life

**Response:** Crime Prevention through Environmental Design (CPTED) is recognized worldwide as an effective tool in reducing crime. Research and case studies have shown that the proper, safe design of the physical environment can result in a lower incidence of crime, increased safety, and an overall increase in quality of life. CPTED has been utilized in law enforcement practices and city design for decades. The basic principles of CPTED are that the environment impacts crime, both as cause and prevention, and effective implementation requires a collaborative effort from law enforcement agencies and community partners. The projects funded through this grant program are still underway or have recently been implemented.

In FY 2023-24, the 18 grantees in this project conducted an array of CPTED projects. These included: improving lighting and visibility in high crime areas across several jurisdictions; controlling vegetation to improve visibility; enhancing public spaces such as trails and parks to make them more attractive; a project to reduce litter which can be seen as an indicator of less citizen guardianship of an area. Below are two examples of projects that highlight some of the positive work done by grantees:

• The City of Colorado Springs' \$1.7 million Memorial Park Safety Improvements project installed 179 new light fixtures, 10 security cameras, and 19 entrance gates throughout the 196 acres of Memorial Park. The limited visibility during night-time

hours in the park led to serious public safety issues. In the period January 2020-September 2022 there were 305 reported crimes in the park, including seven homicides/attempted homicides. The new lights have greatly improved the visibility of the roadways, parking lots, and pedestrian pathways. Preliminary data indicate a 26% reduction in overall offenses in 2024 compared to 2022. The 2024 crime data currently indicate the lowest incidence in the last five years. There were reductions in both aggravated assault and motor vehicle theft in the park, while these offenses showed increases in the rest of the city.

- The Limon Police Department successfully implemented a Lighting in Limon project, installing new lighting along the main street in Limon and new lighting for a walking tunnel. The purpose was to improve personal visibility and security. There had been several incidents in these areas where a witness was not able to identify the offender due to insufficient lighting and hit-and-run crimes which may have occurred in part to insufficient lighting. Feedback from residents is that they feel safer with the added lighting. They feel greater personal security as well as greater visibility to both traffic and law enforcement. Additionally, they are hopeful that businesses in the downtown area will stay open later, which will improve security through creating more dynamic, public spaces and also enhance economic contributions in that area.
- 17. [Rep. Bird] Do any other state funded programs do the same or similar work? If so, please provide a list of programs and funding amounts. How does this program compare to others?

# **Response:** There are no other state-funded programs for Crime Prevention through Environmental Design (CPTED).

### YOUTH DELINQUENCY PREVENTION GRANTS

- 18. [Sen. Brides] Please provide data showing the effectiveness of this program with respect to:
- Crime reduction among youth
- Violence reduction among youth

**Response:** The Youth Delinquency Prevention Grant Program funded multiple projects across the continuum of the juvenile justice system. Each project had independent goals based on the service provided in that community. This LINK provides the final reports from all the funded projects and highlights their individual success.

### Crime reduction among youth:

Programs that reported a re-offense rate reported a 1% recidivism rate. Programs that reported incidents at school reported a 1% suspension/expulsion rate.

### Violence reduction among youth:

Programs reported a reduction in violence risk factors such as; substance use, difficult family relationships, association with delinquent peers, trauma, disengagement with schools, and housing stability. The programs also offered an increased time in healthy

activities and relationships; such as prosocial activities, physical activities, increased employment opportunities, mentoring, improved family relationships, and building connections to the community.

Regarding evidence around the effectiveness of the grant program, there has been encouraging data from some of the programs funded by the pilot program:

• Garfield Youth Services YouthZone: This project's goals were to (1) leverage community partnerships for better outcomes and outreach, (2) reduce barriers to access, and (3) improve capacity to serve youth and families in need of mental health and substance use intervention. The project served 585 clients who were referred by law enforcement, school staff, or as self-referrals on either a pre-filing or pre-arrest basis. The program reported that 90% of youth completed the program successfully with no new criminality, and further observed that post-program re-offense rates for youth who received these services were 50% that of similar youth who did not receive services. The results of the analysis indicate that YouthZone's services are effective in reducing risk in all five of our target areas (alcohol use, substance use, community engagement, and delinquency, optimism and problem-solving, and trauma) for all clients regardless of race, ethnicity, gender, socioeconomic status, location, or reason for referral. Ultimately, the biggest accomplishment was the diversion of more than 500 youths away from the judicial system and into a multidisciplinary system that offers more support to the client and family. The tangible results are a decrease in the strain on the judicial system (with regard to labor, time, and monetary inputs), as well as a decrease in youth recidivism.

• Longmont Community Justice Partnership (LCJP): This program implemented a project called Your Story, Your Power-Theater in Juvenile Diversion. The 19-month project received \$169,801. The goal was to reduce crime and delinquency among youth and reduce any further penetration in the juvenile justice system. The program started in FY 2022-23 and was able to serve 43 youth in FY 2022-23 and 109 youth in FY 2023-24. The main accomplishment has been a reoffense rate of less than 5%, which indicates the interventions and strategies effectively reduced risky behaviors and reduced the number of victims of youth crimes. The program reports positive feedback from youth participants including a reduction in negative feelings and an increase in positive perspectives. Participants reported substantial improvements in self-confidence, interpersonal skills, and a heightened sense of empowerment. They expressed feeling understood and supported, which are crucial factors in reducing the likelihood of re-offense. By implementing structured programs like "Your Story, Your Power" in collaboration with partners such as LCJP and Pathways, the project aimed to provide early intervention and support to youth at risk of entering the juvenile legal system.

19. [Rep. Bird] Do any other state funded programs do the same or similar work (e.g. Tony Grampas)? If so, please provide a list of programs and funding amounts. How does this program compare to others?

**Response:** 26-6.8-101, C.R.S. Tony Grampsas Youth Services (TGYS) Grant Program/CDHS \$13,382,009 FY25. The TGYS Grant Program tends to focus on primary prevention whereas the Youth Delinquency Grant Program focuses on secondary and tertiary

prevention and intervention strategies for youth already engaged in the juvenile justice system.

24-33.5-2703, C.R.S. Youth Violence Prevention Grant Program/OSS \$1 million The Youth Violence Prevention Grant Program was one-time funding in FY24.

20. [Sen. Kirkmeyer] Why would we continue a two-year pilot program?

**Response:** The pilot program was successful and demonstrated the need to support community-based organizations to build capacity, expand services, and provide the services needed in the community. Recent juvenile justice reform efforts implemented across the state have highlighted the need to build capacity in the community to reduce the utilization of secure detention beds and out-of-home placements. By providing additional services available in the community the system can ensure youth receive the right services to ensure public safety and improve outcomes for youth.

21. [Briefing presentation] Why did this request emerge after the statutory authorization for this program expired?

**Response:** The two-year grant pilot program did not end until June 30, 2024, which in turn was also the end of the funding. As discussed with JBC at the time, the DCJ ran the two-year pilot, collected the data, and after seeing the effectiveness, DCJ is requesting additional funding to continue a popular, effective program consistent with that conversation.

22. [Sen. Marchman] What is the justification for the increase administrative costs?

**Response:** The request for the increase in administrative cost pertains to the grantees and not DCJ. The original legislation allowed grantees to only utilize 7.5% of their award for administrative, staffing, and start-up costs. This created a barrier for most of the applicants due to the nature of the projects. In the applicant agencies, the services are provided by their agency staff, and restricting the utilization of the grant funds disqualified them from receiving awards. The full request would be to establish a 10% administrative allowance (industry standard) and to remove the inclusion of staffing from that 10%.

Data show that the communities funded through both grant programs have demonstrated a reduction in crime rates from the beginning of the grant program through the end of the two-year grant cycle. The map shown below illustrates the communities that received funding through both grant programs. The map below shows that funding was spread across the state between urban and rural communities.

1,957,200	Deuel	Keith	SUM(Ame	ount Request
	Sedgwick	Perkir		34,500 00,000
Moffat Jackson Larime. Severance	Phillips	Chase	0 1,00	00,000

Dotores San Jula 287,762 Hineral Rio Grande 90,425 & Animas		Stanton	c	
Montes Durango Plata Archuleta Conejos Costilla Trinidad	Baca	Morton	St	

Since the implementation of the grant programs in FY 2021-22, some of the funded communities have seen a 20%-30% overall crime reduction. The state of Colorado experienced a 12% overall reduction during the same timeframe. The communities of Golden, Limon, and Montrose experienced a much higher reduction than the rest of the state.

### H.B. 24-1219 First Responder Employer Health Benefit Trusts

23. How much of this \$200,000 General Fund appropriation has been spent so far? How much has been encumbered? Also, please provide the same information for the \$300,000 appropriation to the Department of Local Affairs.

**Response:** DCJ is currently working with McGriff, Seibels, and Williams, Inc. (McGriff) to create the trust agreement to administer the fund. McGriff is the current vendor for a similar program created for firefighters that is funded through the Division of Fire Prevention and Control within the Department of Public Safety. A meeting is scheduled for December 10, 2024 to coordinate the development and implementation of the program, and it is anticipated that the initial \$200,000 will be paid to McGriff to support the development of the trust, creation and administration of the program, and to begin providing such tests to peace officers during the current fiscal year.

# ALL DIVISIONS *EXCEPT* FOR CRIMINAL JUSTICE

# COMMON QUESTIONS FOR DISCUSSION AT DEPARTMENT HEARINGS

- 24 Please describe any budget requests that replace one-time General Fund or ARPA funded programs with ongoing appropriations, including the following information:
  - a. Original fund source (General Fund, ARPA, other), amount, and FTE;
  - b. Original program time frame;
  - c. Original authorization (budget decision, legislation, other);
  - d. Requested ongoing fund source, amount, and FTE; and
  - e. Requested time frame (one-time extension or ongoing).

# **Response:** This is not applicable for the Department.

# BUDGET REQUESTS

25 [Briefing presentation] Please explain the relationship between the Digital Trunked Radio System (DTRS) common policy and R1 DTRS Ongoing Operations.

**Response:** The Office of Public Safety Communications (OPSC) comprises two funds: the Public Safety Communications Trust Fund (for infrastructure, i.e. the backbone of the DTRS system) and the Public Safety Communications Revolving Fund (to fund program costs i.e. personal services and operating expenses).

The Revolving fund generates revenue through the common policy, which is based on estimated annual costs and allocated across departments by the number of radios used. This fund covers all OPSC staff personal services expenses and any operating expenses that are not related to infrastructure upgrades or replacements.

The Public Safety Communications Trust Fund (PSCTF) is used for any projects related to upgrading or replacing the infrastructure at radio tower sites or the microwave. The R-01 request is aiming to re-establish the ongoing funding into the PSCTF for these types of projects, since the funding from H.B. 14-1203 ended as of FY 2024-25.

An example of how the expenses are categorized: if a radio tower site infrastructure is being upgraded or replaced, this would be funded from the PSCTF. However, if the radio tower at this site experiences a lightning strike and requires someone to travel to the site and address issues to maintain proper functionality of the site, the labor and associated operating costs (such as the Snocat used to access the site, fuel, tools, and any other parts needed to make the repairs) are funded by the Revolving Fund.

26. [Sen. Kirkmeyer] How are the DTRS common policy allocations determined?

**Response:** The DTRS common policy allocation is set annually, based on the projected cost pool for the upcoming fiscal year, and allocated across departments based on radio count. The cost pool consists of the following components:

- Personal Services (Base Salary, PERA, Medicare)
- Projected operating expenses
- Depreciation expenses

- Common policy allocations Capitol Complex Leased Space and Vehicle Lease Payments
- Estimated Total Compensation adjustments Health Life Dental, AED, SAED, Salary Survey/Step Pay, Short-term Disability, Paid Family Medical Leave and PERA Direct Distribution
- Department overhead, indirects, and SWICAP-related expenses.

The overall projected cost pool is compared to the projected fund balance and if there is still some fund balance remaining, the cost pool is decreased so any surplus in fund balance from one year can be utilized in the following year. The resulting cost pool is then allocated across departments based on the number of radios utilized, and a monthly and annual rate is set for the radio usage. The number of radios within a department multiplied by the annual rate is how the allocations are set in each department's long bill.

27 [Sen. Kirkmeyer] Regarding R1 DTRS Ongoing Operations: What is the number of DTRS users by entity? Who are the users?

**Response:** A complete list of the current DTRS radios, including count by entity and user organization is attached in Hearing Discussion Question #3 - DTRS Radio Counts Appendix A.

28 [Sen. Bridges] Regarding DTRS Ongoing Operations: Does COTAK run on DTRS?

**Response:** COTAK does not provide interoperable communications, does not dispatch, and does not work without cell service. It is a cell phone application. The Division of Fire Prevention and Control (DFPC) is currently testing the integration of GPS radio locations from the DTRS system into the COTAK system. The COTAK team and DTRS team communicate and collaborate on a regular basis. If this can be accomplished, it would provide an additional, highly dependable, data network for COTAK users to share locations on when not in cellphone coverage. When COTAK users are not in cellphone coverage, but are connected to the DTRS network, their locations would still be viewable in the system increasing safety for the users and efficiency for the service population.

29 [Briefing presentation] Regarding R2 PPE Stockpile: Is an appropriation to the cash fund the way to go here?

**Response:** The Department requested an appropriation to the Emergency Stockpile Rotation Cash Fund for transparency purposes. Transfers are not as easily tracked as direct appropriations unless the statute clearly specifies the amount to be transferred, the originating fund, the destination fund, and the date the transfer is made. However, a direct appropriation is subject to the 15 percent reserve requirement, so the Department is comfortable with either approach.

The FY 2023-24 Long Bill currently includes a \$1,809,654 General Fund appropriation for the PPE Emergency Stockpile. The Department requests the General Fund transferred into the Emergency Stockpile Rotation Cash Fund to allow the state to follow the

Governmental Accounting Standards Board (GASB) inventory accounting rules. A direct General Fund appropriation will not follow the GASB inventory accounting rules because of the timing of when inventory can be expensed. Inventory is not expensed until distributed or disposed of which occurs during an emergency or when the equipment expires.

30 [Briefing presentation] Regarding R4 CSP Academy Dining Services: Does the Department expect that it is going to be able to fill these vacancies?

**Response:** The CSP has been using vacancy savings to cover the cost of the food services vendor. In 2024, the CSP started five academies and graduated 87 cadets. The CSP has been successful with its recruiting efforts, more than 1,000 individuals applied to be a CSP Trooper in 2024. If unfunded, the CSP will be forced to use division wide vacancy savings which equates to fewer troopers.

31 [Rep. Taggart] Regarding R4 CSP Academy Dining Services: One of our culinary schools in the Greater Denver Area might be delighted to discuss this. Has the Department discussed this opportunity with culinary schools?

**Response:** The CSP Academy is located at Camp George West in Golden, Colorado. Initial recruiting efforts included posting the available positions on all mainstream job websites/social media and targeting colleges, culinary schools, veterans, and other state employee applicant pools. The available positions were posted on college and all culinary school jobs boards and included University of Colorado - Colorado Springs; Western Colorado University; Colorado Mesa University; University of Colorado Boulder; Colorado State University-Pueblo; Regis University; University of Colorado Denver; University of Northern Colorado; Colorado State University; and Colorado College.

The CSP worked with CDPS HR to contact multiple culinary schools in the Denver Metro Area. After further discussion with the schools, it was determined that utilizing students would not meet the business needs. For example, because they were students, they were not accountable/liable for their shift at the CSP Academy, just as their class attendance is up to them. Confirming attendance and maintaining consistency in CSP Academy operations would have been difficult. Also, the school could not guarantee a specific number of students for each meal shift. It requires a certain number of FTE to serve breakfast, lunch, and dinner, and the schools were concerned with student availability.

Additionally, HR even attempted to hire temporary aides and advertised the positions with various temp agencies. The CSP needs 8-12 employees to operate the kitchen. From all of the different job announcements and different positions the CSP posted, after 20 months, the CSP had received 7 total applications:

- 1 did not meet the minimum requirements for the position and was removed;
- 1 applied and then never responded to communications of next steps;

- 1 was through the Job Store, and after we hired them, they were a no-show, no response to fingerprinting;
- 2 candidates from staffing agencies both failed the criminal history check;
- 1 was hired as a temp aide and, after working six shifts, quit showing up for work and was released for job abandonment;

• 1 was hired and worked for 3 months, then resigned for a higher paying job at another location in the food industry.

# PAST BUDGET REQUESTS AND LEGISLATION

32 [Sen. Bridges] Please discuss the implementation of forensic resources for auto theft and speak to the necessity of the \$750,000 General Fund annualization for FY 2025-26.

**Response:** The hiring of year one DNA scientists (4.0 FTE) was successful and the scientists have begun training. The DNA Forensics program was designed to be phased in over two years and the annualized amount of \$750,000 is the second-year phasing amount. The annualization for FY 2025-26 includes \$379,028 of personal services and \$370,167 of operating funds. This funding is necessary to staff the remainder of the program, fund the DNA commodities for testing, and build the full program to provide DNA testing on 1,900 auto theft cases as outlined in FY2024-25 R-03 to law enforcement investigations of auto theft.

The CBI collaborated with CSP Battle Auto Theft Through Law Enforcement (BATTLE) and Colorado Metro Auto Theft Taskforce (CMATT) to develop case criteria and a selection process to ensure only cases most likely to produce usable DNA results will be submitted for analysis. The program will be rolled out to law enforcement to begin receiving cases on January 1, 2025. 250 cases will be worked by the end of June 2025.

33 [Sen. Bridges] Please speak to the utilization of the ongoing \$7.3 million General Fund appropriation for the Auto Theft Prevention Initiative.

**Response:** FY25 R-01 Colorado Auto Theft Prevention Initiative Grant Funding: \$7,345,944

Funding was allocated to the following initiatives:

- Outreach and Marketing \$462,800
- Victim support \$543,473
- Grants to Law Enforcement \$1,709,286
- Prosecutor Program \$1,496,521
- Auto Theft Tracking \$3,133,649

FY2024-25 CATPA Grant Program	Outreach	Victims Support	Enforcement	Prosecution	Technology	Total

This funding was allocated and awarded to nine grant programs in September 2024, where the grant projects were authorized to begin their scope of work on or after October 3, 2024. The grant application and award schedule was published, and posted at <a href="http://www.lockdownyourcar.org">www.lockdownyourcar.org</a>.

The nine grant programs are multi-agency projects, composed of over sixty (60) law enforcement agencies participating in auto theft task force programs (CATPA Metropolitan Auto Theft Team and Beat Auto Theft Through Law Enforcement), 108 law enforcement agencies participating with the Colorado Information Sharing Consortium, the Attorneys General Office and all district attorney offices participating in the dedicated prosecution program, and engagement with a majority of the state, county and local law enforcement victim advocate offices.

The grant projects were authorized to begin their scope of work on October 3, 2024, where reporting for monthly activities is not received by the CATPA Office until 30 days after the conclusion of each month. As of today, the CATPA Office has not received the first cycle of programmatic reporting or financial reimbursement requests.

The CATPA anticipates a reduction of 25% in auto theft in calendar year 2024 compared to 2023. This is a result of the resources provided and enhanced coordination across the state.

34 [Rep. Sirota] Please provide an update on the \$7.4 million General Fund supplemental increase for DNA testing for FY 2023-24.

**Response:** During the 2024 session, the Department received \$7.4 million to support retesting of DNA in cases that the previous CBI employee may have worked on. Of the \$7.4 million received, \$3.0 million is for the retesting of DNA samples and \$4.4 million for DA reimbursement. As of December 6, 2024, \$67,294.28 has been spent. Multiple cases are being worked by a vendor lab and CBI will be invoiced when testing is completed. CBI continues to work with district attorneys to promptly address their questions, retesting requests, and all other matters related to this investigation and response. CBI expects the retesting and reimbursement numbers to climb as the legal processes associated with this effort continue. Additionally, the CBI will be requesting continued roll forward authority for these funds in January, 2025.

35 [Sen. Amabile] How long is it taking for test those DNA results to come back? What is the average wait time? The median? Please explain the causes of delays.

**Response:** The unfortunate reality is that the lab is experiencing a backlog, with the driving factor being the significant impact of the ongoing investigation of the misconduct performed by the previous CBI employee. The turn-around time (TAT) for DNA casework is currently at 454 days. Eighty percent of the cases are completed in this amount of time or less. The average TAT is 300 days. The median is 291 days.

The reason for these delayed times are primarily due to DNA scientists being pulled away from regular casework as part of the response to the former DNA scientist's misconduct. The comprehensive quality review involved reviewing over 10,000 cases worked by this scientist during her 29 year career with CBI to identify cases where misconduct occurred. CBI DNA scientists also worked with District Attorneys Offices to review both cases impacted by misconduct and cases not impacted by misconduct to assess retesting options and provide expert explanations about the previously performed testing. Some of these cases were then sent to private laboratories for retesting while others, based on case circumstances, were requested to be reworked by CBI. These time-consuming tasks are demanding immediate attention and diverting DNA trainees away from training along with several other members of the DNA team. The CBI is actively looking at options for reducing TAT while maintaining the integrity of the process.

# OTHER ISSUES

36 [Rep. Sirota] Fees for background checks: Can we enterprise the background check function performed by the CBI?

**Response:** The CBI Identification Unit Cash Fund (22Q0) does not qualify for enterprise fund status because the state funding (General Fund and funding from other state agencies) support to the program is greater than 10%.

The CBI's Biometric Identification and Records Unit (BIRU) supports law enforcement agencies and the public and is responsible for maintaining and updating all information in the Automated Fingerprint Identification System(AFIS) used to identify fingerprints.

Additionally, this unit is responsible for entering and disseminating criminal history information into the Colorado Crime Information Center (CCIC).

Currently, the Biometrics Unit has a combination of cash, reappropriated and General Funds for operations and personnel. Twenty-one FTE in the Unit are funded with General Fund, and some of our major vendors (Idemia, Logiko, CPI, etc.) are paid with General Fund. Law enforcement agencies submit criminal and civil transactions into one queue. To better serve our agencies and citizens awaiting requests, all employees, whether they are funded with General, cash or reappropriated funds, are trained to handle both civil and criminal fingerprint background checks.

The CBI fingerprint fee is \$39.50 which includes the FBI fee of \$11.25 to run those prints through the FBI system. The fee was last adjusted in 2005.

37. [Rep. Bird] Is a continuously appropriated cash fund the only way to provide budgetary flexibility? What other ways provide flexibility without taking away the General Assembly's annual appropriation authority?

**Response:** The DFPC has the following fire related funds that are continuously appropriated:

Colorado Firefighting Air Corps - 2013 Emergency Fire Fund - 26Z0 Wildland Fire Equipment Repair Fund - 27A0 Wildland Fire Cost Recovery Fund - 27B0 Wildfire Emergency Fund/Enhanced State Assistance Fund - 3340 Wildfire Preparedness Fund - 3350

DFPC is willing to provide plans, reports, and meet with Committees and individual Legislators as needed. There are no practical options to provide flexibility outside of continuously appropriated funds. Wildfires occur as unscheduled emergency events. We cannot afford to have delays in response in order to pursue legislative or financial processes to fund response and fire management. Conditions and fire activity change rapidly and it's difficult to accurately predict and project needs more than a few months in advance, much less in accordance with State budget cycles. The listed funds are a combination of state appropriations, county contributions, and costs reimbursements. These funds are utilized to prepare for and respond to wildfire incidents. The continuously appropriated funds allow DFPC to rapidly respond to and make decisions on additional resource needs in a timely manner. Interagency wildfire billings and reimbursements also often take multiple years to resolve, which also does not match with a year to year budget process.

Additionally, continuously appropriated funds enable the management of the realities of developing new advanced technology solutions within government and the changes that come with ongoing modernization. Fund 2013 has been a core component of the agility that is necessary to develop advanced technology solutions at a pace commensurate with

the very advancing technology the DFPC is diligently working to employ. This also allows for decision-making that is in line with the development of tools and solutions as opposed to a single-year budget process.

# Local Firefighter Safety and Disease Prevention Fund, Fund 29L0

This fund is used to provide need-based grants for firefighter training, and Personal Protective Equipment to support firefighter safety and cancer prevention. Ninety-seven percent (97%) of the funds are passed through to the local agencies, and 3% is used to cover the administrative costs of the grants. Since these are reimbursement grants, the process hinges on the recipient purchasing and receiving the items and can take over a year for all of the paperwork to be submitted due to supply chain and/or vendor delays. The preparation for each grant cycle is based on the annual appropriation and the stability of the funds allows for a consistent approach to the grant process while maximizing the amount of funds available to the recipients.

38 [Rep. Bird] Please provide a list of continuously appropriated cash funds, revenue sources and amounts, and purpose of the fund.

**Response:** The following are continuously appropriated cash funds within DHSEM:

• Fund 12N0 Public Safety Communications Trust Fund (PSCTF): This fund is continuously appropriated for the purpose of funding the radio equipment acquisition, maintenance and software assurance program in support of the public communications systems. The Digital Trunked Radio System (DTRS) program infrastructure includes 261 radio tower sites across the state, and it is a critical and essential backbone of daily emergency operations.

 $\circ$  General Fund has historically been the source of revenue within fund 12N0, pursuant to H.B. 14-1203.

Beginning with FY 2013-14 through FY 2024-25, an annual General Fund appropriation of \$7.2 million was required to be transferred into the PSCTF.
Continuous spending authority is necessary for this fund because it takes several years to complete infrastructure improvements. Section 24-33.5-2510 (2) (a) (I), C.R.S., allows a statutory cap of \$50 million within this fund, which allows the revenue to remain in the fund while the multiple-year construction or contracts are completed and then billed.

• Fund 6125 Public Safety Communications Revolving Fund: This fund is continuously appropriated for the purpose of funding the Digital Trunked Radio System (DTRS) program operations (personal services and regular operating expenses not related to infrastructure improvements) within the Office of Public Safety Communications (OPSC).

 This fund receives revenue through the Digital Trunked Radio System common policy, which includes various sources of funds within each agency's long bill.
 Continuous spending authority is necessary for this fund because the OPSC staff ensure the DTRS equipment and infrastructure are working properly - certain natural events such as lightning strikes, snowstorms, and other unplanned needs such as failures of equipment require around the clock support 24/7. Because this cannot be planned precisely, the associated costs to support and maintain the DTRS operations can fluctuate year to year, so the continuous spending authority allows the program to spend what is needed, as needed, subject to the available fund balance.

• Fund 28K0 Resource Mobilization Fund: This fund is continuously appropriated for the purpose of supporting the all-hazards mobilization system pursuant to Section 24-33.5-705.4 (1)(a), C.R.S., which provides for efficient mobilizing, tracking, allocating, and demobilizing of emergency response before a disaster is declared by the Governor. The fund is designed to ensure a rapid local response and contain an incident before it becomes a disaster. The fund ensures that a requesting unit of government receives proper equipment and qualified personnel, and is necessary to provide resources to any emergency incident beyond local capabilities which saves lives and protects property without the need for a Governor's Executive Order. This fund also supports deployments around the country during large-scale emergencies and disasters and includes a mechanism to reimburse state agencies, tribal governments, and local jurisdictions that respond to requests for help from other jurisdictions in time of need.

Revenues from this fund were initially provided by Executive Order D 2014-011 (an initial appropriation of \$2 million from the Disaster Emergency Fund) and through reimbursements from other agencies and jurisdictions over time. Additional revenues can be received into the fund from appropriations made by the General Assembly, gifts, grants, reimbursements or donations.
Continuous spending authority is necessary for this fund due to the unpredictable timing of when large-scale disasters will occur; having the ability to spend as-needed is key, as the expenses in this fund are eventually reimbursed, but can be on the books for months at a time before being fully reimbursed (which may cross fiscal years). There would be no way to predict the utilization of this fund.

The following are continuously appropriated cash funds within DFPC:

# Colorado Firefighting Air Corps, Fund 2013

Revenue Sources:

 $\circ$  Fee Sources: Pursuant to Section 24-33.5-1228 (2)(b)(II), C.R.S., the director may enter into agreements with federal agencies or other states for the provision of the C-FAC's firefighting aircraft when the aircraft are not being utilized for fires or other emergencies in Colorado.

• Non-Fee Sources: Pursuant to Section 24-33.5-1228 (3)(a), C.R.S., the division is authorized to seek and accept gifts, grants, reimbursements, investments, bond revenues, sales proceeds, commissions for services, sponsorships, advertising fees, licensing fees, profits, or donations from private or public sources. The fund consists of all moneys that may be appropriated to the fund by the general assembly, and all private and public funds received through gifts, grants, reimbursements, investments, bond revenues, sales proceeds, commissions for services, sponsorships, advertising fees,

licensing fees, profits, or donations that are transmitted to the state treasurer and credited to the fund.

24-33.5-1228 (3)(c)(II), C.R.S., a general fund transfer of thirty million eight hundred thousand dollars for the purchase of a fire hawk helicopter for wildfire and other public safety response needs; and the leasing of a type 1 helicopter/available aviation resource for wildfire mitigation in advance of the 2021 wildfire season and for the operational costs associated with the use of the leased and purchased aviation resources.

24-33.5-1228 (3)(c)(III), C.R.S., a disaster emergency fund transfer of fifteen million five hundred thousand dollars for the following purposes in fiscal year 2021-22 and in fiscal year 2022-23: establishing/maintaining a statewide fire dispatch center to ensure rapid response of fire-based resources to emerging wildfire and all-hazard incidents in support of local, county, state, and federal agencies in Colorado in accordance with section 24-33.5-1203 (1)(x); the leasing of appropriate aviation resources configured for wildfire suppression, for the operational costs associated with the use of the leased and purchased aviation resources, and the costs associated with leasing, purchasing, or owning capital infrastructure to house the aviation resources; and expanding and further implementing the Colorado team awareness kit systems in accordance with subsection (2.5)(b)(V) of this section.

24-33.5-1228 (3)(c)(IV), C.R.S., a general fund transfer of twenty-six million dollars for the purchase of a firehawk helicopter configured for wildfire and other public safety response needs.

• Purpose of Fund: The fund is used to support direct and indirect costs for the DFPC Aircraft Program and the Center of Excellence. Pursuant to Section 24-33.5-1228 (3)(a), C.R.S., the monies in the fund are continuously appropriated. This fund does not have a General Fund (GF) Transfer or dedicated funding source. The cash balance in this fund consists of revenue the Division of Fire Prevention and Control (DFPC) receives from reimbursements for the use of state owned aircraft on billable fire assignments, with the intent of the revenue to fund the costs associated with replacement, maintenance and repair of state owned aviation, including helicopters, fixed wing aircraft, UAS, call when needed aviation contracts, aviation hanger leases and building maintenance, required tools and safety equipment, and other aviation equipment in the future.

# Emergency Fire Fund, Fund 26Z0

- Revenue Sources:
  - Fee Sources: None

 $\circ$  Non-Fee Sources: Pursuant to 24-33.5-1220 (2)(a), C.R.S., the division is authorized to seek and accept gifts, grants, reimbursements, or donations. The fund consists of all monies that may be appropriated thereto by the general assembly and all private and public funds, including from counties and the Denver water board, received through gifts, grants, reimbursements, or donations that are transmitted to the state treasurer and credited to the fund. All interest earned from the investment of moneys in the fund shall be credited to the fund. The moneys in the fund are hereby continuously appropriated for the purposes indicated in this section. Any moneys not expended at the

end of the fiscal year shall remain in the fund and shall not be transferred to or revert to the general fund. The fund receives approximately one million thirty two thousand in annual contributions from Counties, the Denver Water Board, Denver Mountain Parks, Colorado Springs Utilities, and the Aurora Water Board. Participating County and non-County participants pay the annual assessment into this fund based on assessed valuation and forested lands.

• Purpose of Fund: The fund may be used to fund emergency response to wildfires. Pursuant to Section 24-33.5-1220 (2)(a), C.R.S., the moneys in the fund are continuously appropriated.

# Wildland Fire Equipment Repair Fund, Fund 27A0

Revenue Sources:

 $\circ$  Fee Sources: Fees collected for the repair, maintenance, and inspections of wildland fire engines and equipment.

• Non-Fee Sources: Pursuant to 24-33.5-1220 (3), C.R.S., the division is authorized to seek and accept gifts, grants, reimbursements, or donations from private or public sources for the purposes of this section. The fund consists of all moneys that may be appropriated thereto by the general assembly and all private and public funds, including from counties and the Denver water board, received through gifts, grants, reimbursements, or donations that are transmitted to the state treasurer and credited to the fund. All interest earned from the investment of moneys in the fund shall be credited to the fund. The moneys in the fund are hereby continuously appropriated for the purposes set forth in this section. Any moneys not expended at the end of the fiscal year shall remain in the fund and shall not be transferred to or revert to the general fund.

• Purpose of Fund: The fund is used for fire equipment maintenance and repair costs. Pursuant to Section 24-33.5-1220 (3), C.R.S., the moneys in the fund are continuously appropriated. This fund does not have a General Fund (GF) Transfer or dedicated funding source. The cash balance in this fund consists of revenue the Division of Fire Prevention and Control (DFPC) receives from reimbursements for the use of fire equipment while on fire assignments, with the intent of the revenue to fund the costs associated with maintenance and repair of fire equipment, including fire engines, support vehicles, UTV's, required tools and safety equipment, and other fire equipment in the future.

# Wildland Fire Cost Recovery Fund, Fund 27B0

- Revenue Sources:
  - $\circ$  Fee Sources: None

 $\circ$  Non-Fee Sources: Pursuant to Section 24-33.5-1220 (4)(a), C.R.S., this fund is noninterest-bearing. Pursuant to Section 24-33.5-1220 (4)(b), C.R.S., the State Controller may authorize an advance without interest in any amount to provide the Division with working capital for the operation of wildland fire activities. • Purpose of Fund: The fund supports wildland fire reimbursement activities for Colorado cooperators, Counties, and federal agencies. Pursuant to Section 24-33.5-1220 (4)(a), C.R.S., the moneys in the fund are continuously appropriated.

# Local Firefighter Safety and Disease Prevention Fund, Fund 29L0

- Revenue Sources:
  - $\circ$  Fee Sources: None

Non-Fee Sources: The fund consists of all moneys that may be appropriated to the fund by the general assembly and all private and public moneys received through gifts, grants, or donations that are transmitted to the state treasurer and credited to the fund. The state treasurer shall credit all interest earned from the investment of moneys in the fund to the fund. The moneys in the fund are hereby continuously appropriated to the division for the purposes indicated in this section. Any moneys not expended at the end of each fiscal year remain in the fund and shall not be transferred to or revert to the general fund. Recent legislative actions transferred revenue to the fund, specifically: \$100,000 per HB22-1132 in FY23; \$5,000,000 per HB22-1194 in FY22, and; \$1,000,000 per SB22-002 in FY23 which also transfers \$5,000,000 for each of the following two years, FY24 and FY25.

• Purpose of Fund: The moneys in the fund are used to award need-based grants to governing bodies and volunteer fire departments to provide funding or reimbursement for equipment and training designed to increase firefighter safety and prevent occupation-related diseases.

# Wildfire Emergency Fund / Enhanced State Assistance, Fund 3340

• Revenue Sources:

• Fee Sources: None

 $\circ$  Non-Fee Sources: The fund consists of all moneys that may be appropriated thereto by the general assembly, any moneys transferred from the Disaster Emergency Fund pursuant to Section 24-33.5-706 (4.5)(b), C.R.S., and from tax on premiums collected from insurance companies pursuant to Section 10-3-209 (4)(a)(II), C.R.S., and all private and public funds received through gifts, grants, reimbursements, or donations that are transmitted to the state treasurer and credited to the fund. All interest earned from the investment of moneys in the fund shall be credited to the fund.

• Purpose of Fund: The fund is used to provide funding or reimbursement for: At a minimum, the division shall use the moneys in the wildfire emergency response fund to provide funding or reimbursement for: (a) The first aerial tanker flight or the first hour of a firefighting helicopter operating on a wildfire at the request of any county sheriff, municipal fire department, or fire protection district; and (b) The employment of wildfire hand crews to fight a wildfire for the first two days of a wildfire at the request of any county sheriff, municipal fire department, or fire protection district; with a preference for the use of wildfire hand crews from the inmate disaster relief program created in section 17-24-124, C.R.S. (2.5) In addition to any other purpose for the use of

money in the wildfire emergency preparedness fund specified in this section, the division may use money in the fund to provide wildfire suppression assistance to county sheriffs, municipal fire departments, or fire protection districts throughout the state at no cost to such entities pursuant to annual guidelines published by the division in the wildfire preparedness plan required by section 24-33.5-1227(2)(a). (3) On an annual basis, the governor may authorize the division to increase the use of the wildfire emergency response fund to provide funding or reimbursement for additional aerial tanker flights or additional usage of wildfire hand crews to fight a wildfire. The director shall include a request for such authorization in, and in accordance with, the annual wildfire preparedness plan recommendations developed pursuant to section 24-33.5-1227(2). (4) Nothing in this section precludes or prevents the governor, in his or her discretion, from authorizing additional increases or decreasing the use of the wildfire emergency response fund if the actual wildfire situation is more or less severe than anticipated at the time the wildfire preparedness plan required under section 24-33.5-1227(2) was prepared. The fund is utilized during the initial phases of wildfire incidents to provide support and funding for aviation and ground resources to local governments, to remove financial barriers and limitations to response, and to facilitate rapid initial attack actions to limit the size, duration, costs, and impacts of unwanted wildfires.

# Wildfire Preparedness Fund, Fund 3350

- Revenue Sources:
  - $\circ$  Fee Sources: None

• Non-Fee Sources: Tax on premiums collected from insurance companies pursuant to Section 10-3-209 (4)(a)(II), C.R.S. In addition, money that may be appropriated thereto by the general assembly, all private and public money received through gifts, grants, reimbursements or donations, all money transferred to the fund from the healthy forests and vibrant communities fund created in section 23-31-313 (10), money transferred pursuant to subsection (1.5)(a) of this section, and money transferred pursuant to subsections (1)(a)(II) and (1)(a)(III) of this section. Section 39-29-109.3 (2)(n)(I)(C), C.R.S., provides up to ninety-five thousand per year for FY 14-15, FY 15-16, and FY 16-17 from Tier II of the Severance Tax Operational Fund. S.B. 17-259 provided a one-time General Fund transfer totaling eighty-six thousand three hundred sixty-four dollars in FY 17-18 pursuant to Section 24-33.5-1227 (1) (a) (II), C.R.S. S.B. 17-050 extends the Tier II transfers of up to ninety-five thousand dollars per year for seven years, July 1, 2017 through July 1, 2023. SB 19-016 changed the timing of transfers to an arrears model based on actual revenue (39-29-109.3, C.R.S.). Effective July 1, 2020, Severance Tax Operational Fund transfers were reduced to 40% of the transfer amounts specified in statute. The reduced funding is due to a price dispute in the supply chain and the economic impacts of COVID-19 (demand). Effective July 1, 2021, SB 21-281 eliminated the annual Severance Tax Operational Fund transfers, thus eliminating that revenue into the fund. All interest earned from the investment of money in the fund shall be credited to the fund. The money in the fund is continuously appropriated and any money not expended at the end of the fiscal year shall remain in the fund and not transferred to or revert to the General Fund.

• Purpose of Fund: The fund is used to support DFPC staff to provide wildland fire management services and technical assistance to counties and local fire departments in order to keep wildfires with values at risk under control. Pursuant to Section 24-33.5-1227 (1)(a), C.R.S., the moneys in the fund are continuously appropriated.

39. [Sen. Kirkmeyer] How much is in the E911 Enterprise fund? Provide details about the fund, including fund balances, revenue amounts and sources, expenditures, etc.

**Response:** The E911 Enterprise fund belongs to the Department of Regulatory Agencies (DORA); the Department does not have any information on the enterprise. The Department receives no funding from the Enterprise.

DORA will start collecting revenue beginning FY 2025-26. DORA is projected to collect a minimum of \$696,000. The purpose of the enterprise is to impose a 911 enterprise fee on service users to fund expenses such as statewide training initiatives and programs for 911 center personnel, public education campaigns and materials, and other 911 related training and support. The enterprise may establish grant programs for the benefit of local governing bodies or for use as matching funds for eligible projects. The fee must also pay the expenses necessary for administration of the enterprise. Revenue from the fee are put in the 911 Enterprise Cash Fund and continuously appropriated to the enterprise for administration and other programs.

40. [Sen. Kirkmeyer] Please explain all the uses of the HUTF, including what State Patrol gets off the top and what goes to CDOT.

**Response:** The CSP receives most of its funding from an off-the-top (OTT) appropriation from the Highway Users Tax Fund. The OTT appropriation can grow by up to six percent over the previous year's OTT appropriation but to no more than twenty-three percent of the net revenue of the overall HUTF for the prior fiscal year. The FY 2024-25 OTT appropriation to the CDPS was \$208,288,455. The CDPS OTT appropriation can grow 6%, or \$12,497,307, to \$220,785,762 for FY 2025-26. The primary uses of the CDPS OTT appropriation are payroll (70%), indirect and operating common policy payments (11%), vehicle leases, and operating expenses (7%). The remaining 12% is used for various operating expenses, including but not limited to trooper-assigned equipment, IT asset maintenance, the CSP training academy, utilities, Port of Entry building and equipment maintenance, dispatch center operating costs, phones, radios, and computers.

CDOT's portion of HUTF allocation can be used for:

- Salaries, wages, and other necessary expenses for all persons connected with CDOT
- All equipment, furniture, and supplies for officers, division offices, and laboratories as may be established by the director of the highway maintenance division;

• All incidental office expenses, including telegraph, telephone, postal, express charges, and expenses for printing, stationery, and advertising and for the publication of the quarterly bulletin;

• All machines, tools, or other equipment necessary for the furtherance of the work of the department of transportation and also land and buildings for the housing and use of the same;

• The construction, reconstruction, repairs, improvement, planning, supervision, and maintenance of the state highway system and other public highways, including any county and municipal roads and highways, together with the acquisition of rights-of-way and access rights for the same.

In addition to the uses outlined above, there are general restrictions/allowances based on the stream of HUTF funding:

• Revenue from second stream HUTF revenues may not be used for Administration expenses.

• Revenue from FASTER registration fees can only be used for road safety projects.

• A portion of the revenue from the Retail Delivery Fee may be used to fund regional transit projects.

County allocations: The money received is allocated to the counties as provided by law and shall be expended by the counties only on the construction, engineering, reconstruction, maintenance, repair, equipment, improvement, and administration of the county highway systems and any other public highways, including any state highways, together with acquisition of rights-of-way and access rights for the same, for the planning, designing, engineering, acquisition, installation, construction, repair, reconstruction, maintenance, operation, or administration of transit-related projects, including, but not limited to, designated bicycle or pedestrian lanes of highway and infrastructure needed to integrate different transportation modes within a multimodal transportation system.

Municipal Allocations: Money so allocated shall be expended by the cities and incorporated towns for the construction, engineering, reconstruction, maintenance, repair, equipment, improvement, and administration of the system of streets of such city or incorporated town or of any public highways located within such city or incorporated town, including any state highways, together with the acquisition of rights-of-way and access rights for the same, and for the planning, designing, engineering, acquisition, installation, construction, repair, reconstruction, maintenance, operation, or administration of transit-related projects, including, but not limited to, designated bicycle or pedestrian lanes of highway and infrastructure needed to integrate different transportation modes within a multimodal transportation system.

# The Colorado Department of Public Safety/Divison of Criminal Justice Budget Hearing

Joint Budget Committee December 13, 2024

# Colorado Department of Public Safety Mission & Vision

**CDPS Mission:** Engaged employees working together to safeguard the public and deliver diverse public safety services to local communities.

CDPS Vision: Creating safer and more resilient communities across Colorado.

CDPS Motto: Safer Together

# **CDPS** Organizational Chart

### Department of Public Safety FY 2025-26 Budget Request

#### FY 2025-26 Budget Snapshot

FY 2025-26 Total Funds: \$767.7M FY 2025-26 General Fund: \$289.1M FY 2025-26 FTE: 2,391.1

\*The DHSEM currently manages \$2.6 billion in federal grants not reflected in this snapshot

COLORADO Governor Jared Polis

### Department of Public Safety Select FY 2025-26 Top Five Budget Requests

CDPS' FY 2025-26 Budget Request includes the following:

- R-01 Digital Trunk Radio System Ongoing Operating
  - \$15.0M total funds, all from the General Fund.
- R-02 PPE Stockpile
  - \$1.5M total funds, \$179,251 decrease to the General Fund, \$1,630,403 from RF.
- R-03 Training Program for Sex Offender Victim Representatives
  - \$75k total funds, all from Cash Funds.
- R-04 CSP Academy Dining Services
  - \$792k total funds, all from the Highway User Tax Funds
- R-05 Community Corrections Caseload Adjustment
  - \$6.1M total funds, all from the General Fund.

### **Division of Criminal Justice Community Corrections**

- What is the Department doing to address the approval and rejection rates for the local community corrections boards? Please answer this for both diversion and transition placements.
- Are these residential treatment programs are 100% General Fund? Is there any Medicaid?
- What does the DCJ want or need from the DOC and the Judicial to increase the number and efficiency of community corrections placements?

# Division of Criminal Justice DOC Inmates in the Community

- How, and how much, does the Division collaborate with the Department of Corrections? What does the Department want or need from the Division of Criminal Justice in order to increase the number of community placements?
- In a flowchart, please map how a transition placement ends up in community corrections. It should indicate each point where a decision gets made, who makes the decision, and whether that decision is mandatory (e.g. required by statute) or discretionary (e.g. requires personal judgment).

# Division of Criminal Justice DOC Inmates in the Community continued

- The proportion of DOC inmates transitioning to community corrections is also lower than it was a decade ago, despite efforts to the contrary. Why? Please prioritize the factors, from biggest impact to least impact, that are hindering the number and efficiency of DOC community placements.
- How can the State ensure that qualified DOC inmates are approved for a placement in a program that provides an appropriate level of supervision and services? What steps may the State take, or not take, and in what order? If an answer to this question is not available in time for the hearing, how might the DCJ go about answering this question?

# Division of Criminal Justice DOC Inmates in the Community continued

- To what extent are recidivism outcomes for transition and ISP-I placements comparable to other forms of release? Is such a comparison possible?
- What data do the DCJ and DOC have regarding denial reasons for both transition and ISP-I referrals? Please elaborate on this process and the data that are available.

#### Intensive Supervision Program - Inmate

A decline in the number of inmates in ISP-I may be attributed to:

- Reduction of inmates eligible for ISP-I placement
- Inmate choice, if eligible for a referral, to voluntarily waive the referral

Inmates must demonstrate acceptable institutional behavior/criteria including:

- 180 days of their parole eligibility date (PED)
- No Class I Code of Penal Discipline (COPD) convictions in last 18 months
- No Class II COPD convictions within the previous 12 months
- Participating in available DOC recommended programs.
- No documented Security Threat Group activity.
- Inmate has not been assigned Management Control Unit status for >2 years.

#### DCJ/Office of Community Corrections Collaboration

•Collaborations include proposed legislation and implementation, internal policy revisions and specific projects (Standardized Offender Assessment-Revised transition, House Bill 18-1251 working group, facility in-reach efforts, conferences, Case Management training and Case Manager Supervisor Quarterly Meetings)

•Community placement eligibility is mandated by statute and further delineated in department policy, however inmates are able to waive community placements and continue incarceration to their parole eligibility

# Division of Criminal Justice Community Corrections continued

- How and how often does the Office of Community Corrections interface with district attorneys and related associations?
- What auto-accept criteria are currently in use by different jurisdictions? Do these criteria have anything in common?
- What auto-accept criteria are currently in use by different jurisdictions? Do these criteria have anything in common?
- Are there any budget mechanisms that could incentivize such criteria? Could similar mechanisms increase risk tolerance, or is risk tolerance not an issue?

#### **Crime Prevention Environment Design**

- Of the original \$10.0 million General Fund appropriation from S.B. 22-001, how much has been spent for the grant program? How much has been encumbered?
  - Please provide data showing the effectiveness of this program with respect to:
  - Crime reduction
  - Public safety
  - Overall quality of life
- Do any other state funded programs do the same or similar work? If so, please provide a list of programs and funding amounts. How does this program compare to others?

### Youth delinquency prevention grants

- Please provide data showing the effectiveness of this program with respect to:
  - Crime reduction among youth
  - Violence reduction among youth
- Do any other state funded programs do the same or similar work (e.g. Tony Grampas)? If so, please provide a list of programs and funding amounts. How does this program compare to others?
- Why would we continue a two-year pilot program?
- Why did this request emerge after the statutory authorization for this program expired?
- What is the justification for the increase administrative costs?

#### H.B. 24-1219 First Responder Employer Health Benefit Trusts

• How much of this \$200,000 General Fund appropriation has been spent so far? How much has been encumbered? Also, please provide the same information for the \$300,000 appropriation to the Department of Local Affairs.

## The Colorado Department of Public Safety Budget Hearing

### Joint Budget Committee December 13, 2024

#### Colorado Department of Public Safety Mission & Vision

**CDPS Mission:** Engaged employees working together to safeguard the public and deliver diverse public safety services to local communities.

CDPS Vision: Creating safer and more resilient communities across Colorado.

CDPS Motto: Safer Together

#### Department of Public Safety Select FY 2025-26 Top Five Budget Requests

CDPS' FY 202526 Budget Request includes the following:

- R-01 Digital Trunk Radio System Ongoing Operating
  - \$15.0M total funds, all from the General Fund.
- R-02 PPE Stockpile
  - \$1.5M total funds, \$179,251 decrease to the General Fund, \$1,630,403 from RF.
- R-03 Training Program for Sex Offender Victim Representatives
  - \$75k total funds, all from Cash Funds.
- R-04 CSP Academy Dining Services
  - \$792k total funds, all from the Highway User Tax Funds
- R-05 Community Corrections Caseload Adjustment
  - \$6.1M total funds, all from the General Fund.

#### **CDPS** Organizational Chart

#### Department of Public Safety FY 2025-26 Budget Request

#### FY 2025-26 Budget Snapshot

FY 2025-26 Total Funds: \$767.7M FY 2025-26 General Fund: \$289.1M FY 2025-26 FTE: 2,391.1

\*The DHSEM currently manages \$2.6 billion in federal grants not reflected in this snapshot

COLORADO Governor Jared Polis

#### Department of Public Safety Common Discussion Question

- Please describe any budget requests that replace one-time General Fund or ARPA funded programs with ongoing appropriations, including the following information:
  - a. Original fund source (General Fund, ARPA, other), amount, and FTE;
  - b. Original program time frame;
  - c. Original authorization (budget decision, legislation, other);
  - d. Requested ongoing fund source, amount, and FTE; and
  - e. Requested time frame (one-time extension or ongoing).

The Department does not have any budget requests that replace one-time General Fund or ARPA funded programs with ongoing appropriations.

### **R1 DTRS Ongoing Operations**

- Which agencies are charged for the DTRS common policy?
- What is the number of DTRS users by entity? Who are the users?
- Please explain the relationship between the Digital Trunked Radio System (DTRS) common policy and R1 DTRS Ongoing Operations.
- How are the DTRS common policy allocations determined?
- Regarding DTRS Ongoing Operations: Does COTAK run on DTRS?

### DTR Use by Discipline

#### R2 PPE Stockpile

• PPE Stockpile is an appropriation to the cash fund the way to go here?

#### R4 CSP Academy Dining Services

- Will the CSP be able to fill these vacancies?
- One of our culinary schools in the Greater Denver Area might be delighted to discuss this. Has the Department discussed this opportunity with culinary schools, either in the Greater Denver Area or elsewhere? Monthly

### Auto Theft (CSP)

- Please speak to the utilization of the ongoing \$7.3 million General Fund appropriation for the Auto Theft Prevention Initiative.
- Funding was allocated to the following initiatives:
  - Outreach and Marketing \$462,800
  - Victim support \$543,473
  - Grants to Law Enforcement \$1,709,286
  - Prosecutor Program \$1,496,521
  - Auto Theft Tracking \$3,133,649

#### Auto Theft Continued (CBI)

• Please discuss the implementation of forensic resources for auto theft (FY 2024-25 R-03 Forensic Resources to Reduce Auto Theft) and speak to the necessity of the \$750,000 General Fund annualization for FY 2025-26.

### **CBI DNA Testing**

- Please provide an update on the \$7.4 million General Fund supplemental increase for DNA testing.
- How long is it taking to test and those DNA results to come back? What is the average wait time? The median? Please explain the causes of delays.

#### **Background Checks**

• Fees for background checks: Can we enterprise the background check function performed by the CBI?

#### Continuously Appropriated Funds

- Continuously appropriated cash funds and flexibility for things like wildfires. Is a continuously appropriated cash fund the only way to provide flexibility? What other ways provide flexibility without taking away the General Assembly's ability to exercise oversight on an annual basis?
  - Colorado Firefighting Air Corps, Fund 2013
  - Emergency Fire Fund, Fund 26Z0,
  - Wildland Fire Equipment Repair Fund, Fund 27A0
  - Wildland Fire Cost Recovery Fund, Fund 27B0
  - Wildfire Emergency Fund / Enhanced State Assistance, Fund 3340
  - Wildfire Preparedness Fund, Fund 3350

#### E911 Enterprise Fund

• How much is in the E911 Enterprise fund? Provide details about the fund, including fund balances, revenue amounts and sources, expenditures, etc.

#### Uses of HUTF

• Please explain all the uses of the HUTF, including what State Patrol gets off the top and what goes to CDOT.
