

Does Your Home or Business Need an Energy Tune-up?

Get a free* energy audit to make your home or business more energy efficient.
Rebates cover the cost of energy audits and energy efficiency improvements!

ENERGY AUDIT & WEATHERIZATION PROGRAMS

How does it work?

Several programs are available in the region to improve home and business energy efficiency. Combining rebates together can make an energy audit FREE*! After your audit, suggested energy efficiency improvements are provided through a written report. Programs provide assistance for many recommendations. Improvements could include LED lightbulbs, window weatherization, new appliances, new insulation and more. Energy efficiency improvements save you money and contribute to reducing our community energy use. Financing programs are also available for significant improvements.

How do I apply?

If you live within San Miguel Power Association (SMPA) territory, these programs apply to you. Flip this sheet over for a list of energy audit & efficiency improvement programs. To participate or learn more, contact EcoAction Partners.

***About Free Audits:** Total base cost of comprehensive home energy audit is \$300. Audit cost is free after SMPA rebate & Energy Smart Colorado pre-bate. Homes above 3,000 square feet or mechanically complex homes & businesses will incur additional costs. Some distance charges may apply.
