

ECONOMICAL RULES OF THE DYSFUNCTIONAL MEDICAL MARKET

1. More treatment is always better. Default to the most expensive option.
2. A lifetime of treatment is preferable to a cure.
3. Amenities and marketing matter more than good care.
4. As technologies age, prices can rise rather than fall.
5. There is no free choice. Patients are stuck. And they're stuck buying American.
6. More competitors vying for business doesn't mean better prices: it can drive prices up, not down.
7. Economics of scale don't translate to lower prices. With their market power, big providers can simply demand more.
8. There is no such thing as a fixed price for a procedure or test. And the uninsured pay the highest prices of all.
9. There are no standards for billing. There's money to be made in billing for anything and everything.
10. Prices will rise to whatever the market will bear.
