

Proposition 129: Establishing Veterinary Professional Associates

Placed on the ballot by citizen initiative • Passes with a majority vote

1 **Proposition 129 proposes amending the Colorado statutes to:**

- 2 • create the state-regulated profession of veterinary professional associate in the
3 field of veterinary care; and
- 4 • outline the minimum education and qualifications required to become a
5 veterinary professional associate.

6 **What Your Vote Means**

7 **YES**

8 A “yes” vote on Proposition 129
9 establishes the new regulated profession
10 of veterinary professional associate as a
11 provider of veterinary care, alongside
12 veterinarians, veterinary technicians, and
13 veterinary technician specialists.

14 **NO**

15 A “no” vote on Proposition 129 allows
16 only veterinarians, veterinary technicians,
17 and veterinary technician specialists to be
18 regulated providers of veterinary care in
19 Colorado.

20 **Summary and Analysis of Proposition 129**

21 **Who can provide veterinary care in Colorado?**

22 Under current law, a licensed veterinarian, a registered veterinary technician (vet tech), a
23 registered veterinary technician specialist (vet tech specialist), and other qualified personnel
24 may provide veterinary care in Colorado. Current law establishes the scope of work for
25 veterinarians and specifies some of the tasks that a veterinarian can delegate to vet techs,
26 vet tech specialists or other qualified individuals. The Colorado State Board of Veterinary
27 Medicine (state board) regulates these three licensed and registered professions, and creates
28 rules for the practice and supervision of veterinary care, professional and academic
29 qualifications, continuing education requirements, and disciplinary measures.

30 **What is a veterinary professional associate?**

31 Proposition 129 creates and adds the new regulated profession of veterinary professional
32 associate in Colorado’s field of veterinary care. At a minimum, a qualified veterinary
33 professional associate must receive a master’s degree in veterinary clinical care, or an
34 equivalent degree determined by the state board. The state board may also adopt additional
35 credentials or testing requirements to become a veterinary professional associate in the
36 state. Similar to a vet tech or vet tech specialist, this new professional may perform tasks that

1 are within their advanced education and training, while under the supervision of a
2 veterinarian. The state board may determine the specific tasks and level of supervision
3 required.

4 Table 1 describes the educational requirements and scope of practice limitations for current
5 and proposed veterinary professions in Colorado.

6 **Table 1**
7 **Veterinary Professions in Colorado Under Current Law and Proposition 129**

	Veterinary Technician (current law)	Veterinary Technician Specialist (current law)	Doctor of Veterinary Medicine (current law)	Veterinary Professional Associate (under Proposition 129)
Degree Requirements	Either an associate’s or bachelor’s degree in veterinary technology.	Either an associate’s or bachelor’s degree in veterinary technology, and three to five years of clinical experience and training.	Advanced doctorate degree and clinical experience.	Master’s degree in veterinary clinical care. Additional qualifications and training may be determined by the state board.
Scope of Practice	Provides support to licensed veterinarians, including performing dental procedures, advanced nursing care, animal health education, and treating minor medical conditions.	Performs the same tasks as a veterinary technician, as well as specialized support including emergency medicine and surgical assistance.	Performs all levels of care including diagnosis, prognosis, prescribing medications, and conducting surgery. Responsible for the supervision of all veterinary care.	May perform tasks that are within the individual’s advanced education and training. Full scope of practice may be determined by the state board.

1 **Argument For Proposition 129**

2 1) Many Coloradans struggle to get veterinary care for their animals, especially in rural and
3 agricultural communities. Allowing new veterinary providers to practice under state law
4 may create more training and career opportunities for veterinary professionals, leading
5 to expanded access. Veterinary professional associates could provide needed relief to
6 overworked veterinarians, allowing them to delegate additional tasks and take better
7 care of animals in Colorado.

8 **Argument Against Proposition 129**

9 1) The measure’s education and training requirements are vague and do not differentiate
10 veterinary professional associates from existing veterinary care professionals. There are
11 currently no academic programs for this profession in Colorado, so it is unclear when
12 anyone would be eligible to work as a veterinary professional associate. Creating a new
13 and untested profession could increase risk for animals.

14 **Fiscal Impact of Proposition 129**

15 **State revenue and spending.** Workload for the state board will increase to adopt rules, but
16 spending for this effort is expected to be minimal. Once a population of veterinary
17 professional associates exists, state spending will increase for oversight and enforcement of
18 the new profession, and state revenue will increase in equal amounts from registration fees
19 charged to associates.
