

Draft Proposed Language

24-18-301(5) (b) "Facial recognition service" does not include:

(IV) A product, device, or software application that allows for analysis of facial features for educational purposes in conjunction with curriculum approved by the local school board of a Colorado public school district; or

(V) a product, device, or software application that allows for analysis of facial features under the following circumstances:

(A) an individual makes an articulable and significant threat against a school or the occupants of a school, and the use of facial recognition technology may assist in keeping such school or occupants safe;

(B) a student absconds from a school class, field trip, event, or program or is otherwise reported as lost or missing by the student's parents, teachers, or school officials, and there is a reasonable belief that using facial recognition technology may assist in finding the lost student; or

(C) an individual has been ordered to stay off school district property, and, based on threatening or harassing behavior, there is a reasonable belief that such an individual may attempt to reenter district property in the future.
