

Shall the state remove the retail delivery fee from all deliveries made in Colorado. In 2022 a law was passed that stole money from Colorado residence for every attempted delivery made regardless of the cost or success. This proposal would be to overturn the unfair burden the state has imposed on Colorado residence. Currently the 29 cent fee which is a tax on all deliveries is 25+ percent of a common item costs like toothbrushes or soap. Delivery fees are also charged per order even if the items are all shipped together. This tax is a tariff charged by our government to control Coloradans, which no other state has adopted. Legislators have no end to what they may charge for this fee as it started at 25 cents in 2022 and has grown 16 percent in only two years, which is why it needs to be removed. All the retail delivery fee has accomplished is to rob tax payers one package at a time. Elderly tax payers on fixed income or with mobility problems are now forced to chose between their everyday essentials or doing without. The law was a disgusting tax that has been imposed on our residence. And with this proposal it would be overturned.
