

MEMORANDUM

JOINT BUDGET COMMITTEE

TO Joint Budget Committee Members
FROM Carolyn Kampman, JBC Staff Director
DATE March 20, 2023
SUBJECT Referendum C Recommendations for FY 2023-24 Long Bill

In November 2005 voters approved Referendum C, which authorizes the State to retain and spend certain state revenues that exceed the limitation on state fiscal year spending in the Taxpayer's Bill of Rights (TABOR). The excess revenues the State is allowed to retain and spend are credited to the General Fund Exempt Account within the General Fund. The General Assembly may only appropriate money in the Account for purposes that are specified in statute, including: health care; education; retirement plans for firefighters and police officers; and strategic transportation projects. For further details, see the "Background Information" section at the end of this memorandum.

The actual amount of excess revenues that is credited to the Account is not known until after the books for a fiscal year are finalized. Thus, initial Long Bill appropriations from the Account are based on projections from the revenue forecast selected by the Committee. **This memorandum includes recommendations for adjusting appropriations from the General Fund Exempt Account for FY 2022-23 and FY 2023-24 based on projections in the March 2023 forecast from the Office of State Planning and Budgeting.**

Please note that recommended amounts from the General Fund Exempt Account for FY 2023-24 will remain unchanged if the Committee takes action to reduce or increase any of the appropriations listed in the following tables. Any adjustments will be made to the General Fund appropriation.

Both tables utilize the same allocation method that has been used for many years (see the Background Information section of this document for more information).

BACKGROUND INFORMATION

There are two statutory provisions that relate to Referendum C, which was approved by voters in November 2005.

First, Section 24-77-103.6 (1) and (2), C.R.S., authorizes the State to “retain and spend all state revenues that are in excess of the limitation on state fiscal year spending, but less than the excess state revenues cap for the given fiscal year”. The General Fund Exempt Account, created within the General Fund, consists of an amount of General Fund revenue equal to the amount of revenues in excess of the limitation on state fiscal year spending that the state retains for a given fiscal year. Money in the Account “shall be appropriated or transferred by the general assembly for the following purposes:

- (a) To fund health care;
- (b) To fund education, including any capital construction projects related thereto;
- (c) To fund retirement plans for firefighters and police officers, so long as the general assembly determines that such funding is necessary; and
- (d) To pay for strategic transportation projects included in the department of transportation's strategic transportation project investment program.”

Within this first provision, "education" is defined to include public elementary and high school education; and higher education.

Second, Section 24-77-104.5, C.R.S., provides further direction about how money in the Account shall be appropriated or transferred. Paragraph (a) of this provision indicates that available money in the Account shall be used as follows:

- If the voters approve Referendum D (a referred measure concerning transportation projects), the General Assembly may appropriate money from the Account to the Critical Needs Fund to make payments on principal and interest on critical needs notes issued.
- If the voters do not approve Referendum D, money in the Account shall be used in a manner consistent with section 24-77-103.6 (2).
- The amount appropriated or transferred pursuant to this provision shall be:
 - (1) \$55.0 million in FY 2005-06;
 - (2) \$95.0 million in FY 2006-07; and
 - (3) \$125.0 million in each subsequent state fiscal year.

Paragraph (b) of this provision states that if there is any money in the Account after the appropriations or transfers required by paragraph (a), then all moneys remaining in the account shall be split equally for the following three purposes:

- health care;
- preschool through twelfth grade education; and
- for the benefit of students attending community colleges and other institutions of higher education.

Voters did not approve Referendum D. Based on these two provisions, the money in the Account has been allocated annually as follows:

- The first \$125.0 million is allocated for transportation (\$500,000 has been the amount typically used) and for firefighter benefits (this appropriation fluctuates, but it's typically around \$4.3 million). The remainder is split evenly between health care and K12 education.
- Any amount in excess of \$125.0 million is split equally between health care, K12 education, and higher education.
- As a result, the allocation for higher education is typically about \$60.0 million lower than the allocations for health care and for K12 education.
