Scope of Work

During the 2018 Legislative Session, the General Assembly passed Senate Bill 18-200, which created the Pension Review Subcommittee (subcommittee). The subcommittee is authorized by Section 24-51.1-101 (4)(h), C.R.S., to “commission an independent review of the economic and investment assumptions used to model the public employees’ retirement association financial situation.” The LCS is seeking proposals from nationally recognized firms that have experience with large public sector pension plans to conduct the study. According to Section 24-51.1-101 (4)(h), C.R.S., experts who are already working on behalf of PERA are not eligible for the contract.

The scope of the study will address the objective and, at a minimum, address the list of task items noted below. Responses to this RFP should set forth, in detail, the approaches, steps, and methodology that the bidder will follow to achieve the objective and respond to each item in the task list below. Additionally, bidders should anticipate that in order to conclude the study, work steps may evolve and change as work progresses and evidence is gathered. If bidders have ideas for alternative approaches that would potentially address the objective more cost-effectively, then such alternative approaches should also be clearly outlined in the bid proposal.

Objective. Perform a review of the economic and investment assumptions used to model PERA’s financial situation.

To achieve the objective, the study should include:

1. An analysis of the validity and appropriateness of the actuarial methods and assumptions adopted by the PERA Board that are used in the actuarial valuations of the financial situation of the Hybrid DB Plan.
2. Identifying deviations in actuarial methods and assumptions that have resulted in the
existing Hybrid DB Plan terms and provisions no longer meeting targets and achieving sustainability that could indicate that assumptions should be changed.

3. Recommendations for any adjustments that should be considered with respect to the assumptions used to model PERA’s financial situation.

4. An analysis of whether or not PERA is on track to achieve full funding by 2048, including the likelihood of achieving full funding, and, if not, recommendations for corrective actions.

5. An analysis of the calculated normal costs that will cover current pension benefits and the share of contributions going to cover the unfunded liability of PERA.

6. Recommendations about the necessity of continuing the direct distribution to PERA pursuant to Section 24-51-414, C.R.S.

7. Recommendations about the enhancements that PERA could make to the annual analysis that it conducts pursuant to Senate Bill 14-214 to determine whether its model assumptions are meeting targets and achieving sustainability.

8. Any other recommendations the subcommittee could make to PERA regarding assumptions, funding policy, reporting practices, or other operational policies.
