Bill: Protection of Pollinators

Date: 3/5/20

Bees are one of the
~~most important~~ most important
 pollinators, and without
 them, the food chain
 will collapse. Also,
 there is the CCD, colony collapse disorder.
 without pollinators, our food will run
 out in terms of vegetables and
 food farmed.

Bill: Protection of Pollinators

Date: 3/5/20

In school as a middle schooler, we learn about bees and pollinators. As people and citizens we

take advantage of our access to food that is healthy and kind to our bodies. If we as common people could eat fruit or literally anything and not have to worry about killing innocent lives of pollinators or more importantly the health of our population. As I'm sure most of us know pesticides/neonicotinoids are intensely harmful to our population. Working to help this issue is increasingly difficult as a teen and/or in general. Passing a bill to save these would be beneficial.

Bill: Protection of Pollinators

Date: 3-5-20

In our world we have bees.
 They help us and we help
 them. We give them flowers
 to pollinate they give
 us honey. Many people are
 scared of bees so they kill them. Let's save
 them

Bill:

Date:

We should save the bee's
because they pollinate
our flowers, trees, and
plants. If we use things
like bug exterminators,
spray poison, or toxic chemicals, against bees, then plants won't grow and we won't
get any food or plants.

Bill:

Date:

We should save the bees because they pollinate our flower, trees, And other plants. Some fruits of veggies would probably be hard to find without bees. Bug exterminators spray of toxic chemicals can be harmful against bees so we should stop using them.

Bill:

201180

Date:

3/5/20

Nio-nicitinoid products
are problematic
for many reasons,
but the main
reason that they

are ~~are~~ such a problem is that
they are killing the bee population.
Bees are important becvasse they
pollinate our flowers, crops, and power
our base of biodiversity. with
out bees, we will not have
trees, crops, or anything green
at all. Also, when we spray these
products on our crops, we eat
chemicals, wich isn't good for
our bodies. All in all, this
bill should be supported to
ban Nio nicitinoid products
becvasse it distroys our
biodiversity, and our future.

Bill: 20 1180

Date: 3/5/2020

Banning or reducing the neo-nicotinoid products can and most likely will help save pollinators, such as bee, butterflies, bees, ex. Pollinators help plants to reproduce, the more flowers, trees, grass and other plants can make more oxygen from photosynthesis. If these products that includes these chemicals will reduce the population of pollinators that will reduce the plant growth, causing less photosynthesis.

Bill: 1180

Date: 3/5/2020

We are here as a
mom and daughter
in favor of bill
1180. Not only are
we concerned about
the livelihood of all pollinators but
also exposure to pesticides themselves
as homeowners, a mom, a daughter and
dog owners. Please seriously consider
this bill just for the "common man"
who owns property and has young children.

~~1189~~

~~3/5/20~~

pesticides kill bad bugs. Also, and many more invasive organisms. But have we ever thought about the flowers? No because, "Pesticides won't hurt flowers." (BTW that's wrong.) Flowers are one of the species that keeps us here on this planet. They help us breathe clean CO₂ free air. They provide people a non meat option. So think think about what we need to do. What we need to do for the environment.

Banish Plastic

Endre Oaker
6th Grader at
Glennview Middle
School, Boulder

I'm glad it's time ^{time for} one of our greatest unconscious foes to banish. polystyrene or more commonly known styrofoam. Styrofoam is a "horribly" negative environmental problem after it has no use anymore; It cannot be recycled and just drifts around in the world causing nothing ^{but} havoc to our ecosystem. This is just the same with single used plastics. Single Use plastics and styrofoams take hundreds of years to break down which means that every piece of plastic that we have created is still in existence. Think about that, 7 billion people in the world times 6 generations before them, where would we put all that plastic? Nowhere. Plastic is good for nothing and no one. It hurts animals' stomachs and is terrible for ours. It demolishes the ocean in thousands of ways and in no way helpful for plants at all. I do not want this wretched stuff in my future, the next generation's future or the one after that.

So Please let's end it, now before it's too late, and support there acts and turn them into laws to preserve our world. None of what is going on can't be done without all your effort and help. Thank you for coming and I hope you all have a great day.
