RE: HB25-1113, Limit Turf in New Residential Development

Dear Chair Roberts and Committee Members:

Watershed Geo is an infrastructure technology company that designs products to address some of the world's most challenging infrastructure problems. Our products include solutions that are approved by professional engineers for a variety of purposes, including coverage for solid waste facilities and brownfield sites, as well as erosion control for slopes, channels, levees, and dams. These products include a synthetic turf component. We worked with the proponents on amendment language to HB 25-1113 that will allow local entities to install innovative solutions like these to address various civil infrastructure needs.

With the adoption of the amendment, Watershed Geo will be in support of the bill. Thank you to Senator Dylan Roberts and the bill proponents for working with us on the amendment that is being offered today. We encourage the Committee to support the bill as amended.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bryan Jacob', written in a cursive style.
