

Dear, Senate Local Government Committee

I wanna start by saying that I would like bill SB19-192 The Front Range Waste Division Act to pass. I want this bill to pass because my class and I all go and recycled we have to plan a ride, grab all the bins, load it to the van, take it to North Star, unload and put them in the right bins, and go back to school, put them back in all the class. I also want to help the animals that can't tell the different between food and plastic. If not only helps the animal but also reduces greenhouse gases. Lastly I wanna say that I hope you can around and support the SB19-192 The Front Range Waste Division Act.

Sincerely,
Valerie Homan

To Senate Local Government Committee,
SB 19 ~ 192

Hello my name is Marcin from the New America school in Thornton. Lately we have been working on getting a recycling program here at our school. Right now we are taking our recycling to North Star manually. Our teacher is kind enough to rent a van to be able to transport our recycling. We want to work on getting our own recycle bin behind the school. It will really help us with time saving. Baby steps, soon will lead a marathon.

Dear Senate Local Committee

I think bill SB19-192 has to be accepted. I think this because at my leadership class have been recycling, but it hasn't been easy because to be able to recycle we have to do many stuff that takes us time. I think this bill will make recycling for the school. Thank you for listening to us, and I honestly I'll like this bill to become a law.

Sincerely, Jose L. Pabelo

80022

I support the bill SB19-192 The Front Range Waste Diversion Act.

I would love to see this bill pass. This bill will spark a great change to a bright and healthy future. I'm a student at the New America School in Thornton. If this bill is passed it will help make our recycling process easier for us. This is because our class the leadership class, we take our time every two weeks to recycle. This is a bit of a difficult process for us because it's time consuming, it takes us about an hour to gather all the class recycling bins and packing it into a van we get by our teachers who takes her morning to get a van for us. Once our rented van is full with our recycling bins we take a 3 min drive to a park center where there is a recycling dumpsters and we recycle. This process is not easy! it is please and we have to have team work.

This bill will not only help make our recycling process easier but it will also help create a healthier environment and to create a better healthy generation in the future.

Sincerely, Aiyisha Medina

I support bill SB 19-192. The Front Range Waste Diversion Act, because me and my classmates at New America School of Thornton, myself, my leadership class took a huge step to better our school, by recycling. We also want to recycle to help our environment and our animals. It is very important to us, to create a positive change in our community! This will help us make recycling easier for us, because the process to recycle is a little difficult for us to do by ourselves. Because my teacher has to make effort to rent a van, for us, and she also has to pay gas. We also want future generations to have recycling in our school, and to also help our future generation with a beautiful, healthy planet! We would love to see this ~~bill~~ bill bloom the area of Thornton!

Dear Senate Local Government

I want to say that the bill SB19-192 it should pass because we will no longer be wasting left overs and we can give those left overs to the people that have farms it will help the environment will start being clean we will not be mixing the trash with the left overs.

Sincerely
Eunice De Santiago
