

~~Dear Council Member,~~

Why does Denver still encourage people to break the public consumption of cannabis law?

Proof that even Walgreens is hip to the disparity in the public consumption rules.

Attached is a picture I took of an aisle end cap at the 16th Street Mall Walgreens. It is a display of ( holds 150 canisters (Vanilla/Regular)

What is Ozium?

**Ozium** aerosol air sanitizer will effectively eliminate unpleasant odor anywhere it is sprayed ... **Ozium** was originally developed to combat airborne bacteria and germs in hospitals and facilities. It eliminates smoke and offensive odors rather than just masking them as many fragrance products do.

Tourists and other are using this product in their hotel rooms and automobiles to basically no consumption in public regulations both Denver's and the State's

I inquired at two head shops (cannabis smoking paraphernalia stores} in the downtown area neither carry the cannabis masking product Ozium.

Now if this isn't a call for the need for more cannabis lounges and looser regulations what is?

Are there children present in the hotel rooms and cars? People are always interrupting my public with the sentence, "What about the kids?". Well this a true "What about the kids"!

The other scenario for the call for lounges. Mom & Dad need places to consume away from their and on Saturday night date night.

Tobacco stores that allow smoking circumvent the Clean Air Act by making patrons sign a waiver an approach that we should consider instead of just vaping. Which by the way (vaping) is under a current bill at the Colorado State House.

So much backdoor prohibition happening when the will of the people is still being infringed upon. Get over the stigma and face the reality. Let people enjoy their over taxed medicine and recreational safe controlled environment.

I am a Colorado citizen and a registered voter

Peace, Pot, Politics,

Wayward Bill (William) Chengelis

Chairman, U.S. Marijuana Party
