 "Snap" freezing in LN₂; shipped on dry ice

- Media provided by applicant
 Media provided by ABR (RPMI)

IV. DONOR INFORMATION

CONSENT VERIFICATION: Consent for tissue donation is obtained prior to specimen procurement. The consent is extremely confidential in nature and shall not be communicated to the researcher or facility.

SPECIFIC DONOR INFORMATION: Charts are routinely examined for patient medical histories. Please identify any specific information sought and indicate any contraindications to specimen procurement:

Contra-indications: Family history of inherited blindness; for example retinitis pigmentosa (RP)

V. RESEARCH DATA

TITLE OF RESEARCH PROJECT: Simultaneous, Structural And Functional Imaging Of The Retinal Pigment Epithelium

ABR will provide tissue to researchers who provide information on current research funding, and a short summary of their research intent. (Please attach a brief synopsis of the research project named above.) Researchers must agree to use the tissue solely for research purposes and to acknowledge ABR in any publications resulting from the use of ABR provided tissue. Updates on research progress will be required at six-month intervals. Researchers agree to publish the results of the research as promptly after the completion of the research as is reasonably possible without jeopardizing the sponsor's right to secure patents or copyrights necessary to protect its ownership or control of the results of the research. Researchers agree to inform ABR of the name of the publication and the date of the issue in which the results will be published. It is the intent of this requirement to make the results available to the general public through acceptable means of publication.

VI. SOURCE OF FUNDING

Please identify the primary source of funding for this project.

- NIH Other Federal or State Grants Foundation Grants Other (specify)

If this application is approved by ABR, ABR shall provide services to the applicant in accordance with the terms and the other conditions that follow. The signature of the applicant shall constitute acceptance of all such terms and conditions by applicant. The entire agreement between ABR and applicant relating to the services provided by ABR is expressly set forth herein, and any modification of or addition thereto shall be of no force or effect unless it is in writing and signed on behalf of ABR by a duly authorized representative.

BY SIGNING BELOW, THE APPLICANT ACKNOWLEDGES HAVING READ THE TERMS AND CONDITIONS ON THE FOLLOWING PAGE AND AGREES TO SUCH TERMS AND CONDITIONS.

To Whom It May Concern:

This letter verifies that ABR, a non-profit tissue procurement organization, supplies requesting and approved scientific investigators with the types of human fetal tissues required for specific bio-medical research. When requested and as availability allows, human fetal tissue specimens will be retrieved from products of conception from induced first and second trimester abortions. Tissue will be distributed according to established protocols.

ABR warrants that maternal consent from patients aged over eighteen years is obtained for the use of fetal tissue specimens for research purposes, including the consent for the potential of stem cell research utilizing such tissues, and that adequate records of such consent are maintained for future verification. ABR also warrants that maternal consent is obtained for phlebotomy and blood testing for a variety of disease entities.

ABR warrants that no payments will be made to any third party for the conduct of or the product of an abortion, including without limitation any parent(e) of any unborn fetus. ABR, to the best of its knowledge, also warrants that all tissue provided will have been obtained in compliance with local, state and federal laws and regulations governing the procurement and distribution of human tissue.

Dr. [REDACTED] research project titled Targeting p53 in Vitiligo Repigmentation was approved by ABR 6 Sep 2011.

Sincerely,
