

80 plus population

Total population

Blue is total population. Orange is population aged 80 and older

Although people of all ages may need services — the need increases significantly at age 80. Because of constitutional limitations state revenue will increase based on the increase in population. The inflation factor is not considered because the cost of providing services will also increase. The 80 plus population is increasing faster than overall population resulting in less funding available to provide all the services currently provided.
