

Kidney Dialysis Children's Morality History:

Since 1991:

children age 10–19, mortality due to infection – up 19%

(children age 10–19, cardiovascular mortality – up 62%)

2006 ADR pg. 160¹ United States Renal Data System (stats are two years behind)

(1991 - 2004 was a time when the for-profit Large Dialysis Organizations - DaVita and Fresenius - were buying up small dialysis clinics)

Kidney Dialysis Children's Latest Mortality Stats:

September 5, 2023 JAMA Network article

In this cohort study of 15,359 pediatric patients receiving dialysis, risk of death for those treated in profit facilities was 2-fold higher than in nonprofit facilities

(update: the costs for what's above, the highest in the industrialized world (about \$35 billion per year)⁽¹⁾⁽²⁾)
