SB26-101 Local Gov Landfill Methane Emission Reduction Regs

Typed Text of Testimony Submitted

Name, Position, Representing	Typed Text of Testimony
Virginia Winter For themselves	I stand in favor of SB 26 101 because it appears to amend the original bill and will remove rollback language, eliminate compliance delays and refocus funding on implementation. Please do NOT LET industry shift the burden to communities for compliance. Methane, in particular, is a SIGNIFICANT climate/atmospheric pollutant (GHG) and we must do everything we can to curtail its release or prevent it. This is a human health issue that disproportionately affects lower 'income' communities and people of color.
