jeany Rush Against themselves	TO: SENATE TRANSPORTATION & ENERGY RE: SB26-082 LOC. GOV. RENEWABLE ENERGY DEV FEE SPONSOR: B PELTON FROM: JEANY RUSH COLORADO CONSTITUENT 4-29-26 VOTE: NO "NO MORE PAY FOR PLAY" FOLKS "The local government may establish fees for an application for a renewable energy project and may offer two independent tracks for the application based on the fee the facility owner pays. The standard track allows a facility owner to pay a lower fee, but does not guarantee a specific timeline for the local government to issue a final decision on the application. The expedited track allows a facility owner to pay an additional fee, with an agreement that if the local government takes longer than 120 days, minus any permitted tolling periods, a percentage of the higher fee will be refunded." THIS IS YOUR DESCRIPTION! I find a few problems with this bill: 1. You are assuming we will continue down the totally unscientific, unreliable, unsustainable, massively too costly, RENEWABLE ENERGY hoax which is part of the green deal/clean energy/zero tolerance for CO2, which is plant food, and the whole Colorado FAUX Clean Emissions Agenda! 2. You are giving private/public/partnerships, NGOs, Shell Corporations, and many other companies a carte blanche, or quicker ride to effect their agenda for projects which we should never have allowed, or entertained. This opens doors for more of the same abuse we are currently experiencing by Excel's eminent domain misbehavior acts, Colorado's failed Energy policies, and the rip-off of the citizens by too many of these quicky projects, which enrich anyone but us. You are absolutely playing into the hands and agenda of the World Economic Forum and its Global agenda, robbing us of energy,

	<p>food, land, water, air, and basically what sustains life! UN Agenda 2030 is about depopulation of 2/3 of us by 2030, along with Rewilding 30X30 percent of global land that non of us can access. But we own this land, so why would you take it away from us illegally, and in such nefarious ways?</p>
