RE: CRES Supports HB 23-1005 New Energy Improvement Program Changes

Dear **Bill Sponsors**: Representatives: Jenny Willford and Brianna Titone, and Senators: Sonya Jaquez Lewis and Janice Marchman;
and **Senate Transportation & Energy Committee Members**:

The Colorado Renewable Energy Society (CRES) wants to thank the bill sponsors for bringing this bill. The CRES Policy Committee members unanimously support this bill and urge all Senate Ag & Natural Resources Committee members to vote yes to help pass this bill.

CRES is a nonpartisan, science-based non-profit with thousands of members throughout the state. The CRES Policy Committee brings together a broad range of energy policy and technology experts who review energy bills before the Colorado state legislature to provide our perspective.

CRES supports this bill that makes helpful changes to the C-PACE program to help property owners to finance energy efficiency improvements. Energy efficiency is a vital first step to providing more sustainable, and climate-friendly building stock here in Colorado. The energy efficiency measures will lead to a large reduction in greenhouse gas emissions, and cost savings for building owners.

CRES (Boulder County Chapter) is proud to have Tracy Phillips (Director of the CO C-PACE program) back as its next speaker Wednesday, March 8th in Boulder. Feel free to [sign up on our Meetup page to register](#) for the talk and learn more about the program.

Thank you again to the bill sponsors and for your support of this bill in the Senate and for all that you do for Colorado.

Sincerely,

Vincent Calvano

Chair of the Colorado Renewable Energy Society Policy Committee
